CATALOGUE

OF

Herbaceous Perennials and Shrubs,

OFFERED BY

JACOB W. MANNING,

READING NURSERY,

Reading, Mass.

The Nursery is on the line of the Boston and Maine R. R., 12 miles from Boston, and half way between Boston and Lowell, and Boston and Lawrence. The grounds are only 5 minutes walk from the Reading Station, and the limits of the upper nursery are within 200 feet of the Reading Highland Station.

We have besides the plants named in this catalogue a full assortment of *large* and *small fruits*, *evergreen* and *deciduous ornamental trees*, growing in our grounds. Especial attention is called to our collection of *trimmed evergreens* for the lawn, and our *evergreen hedges;* all in the best condition to transplant.

We invite all to come and look over our grounds at any time. Our collection of perennials afford a great variety of flowers at all times in the season. Our collection of ornamental trees and shrubs is very extensive.

OUR TERMS ARE CASH.

Reading has recently been made a money-order office, so that all money orders should be drawn on Reading.

We deliver all packages at the express or freight office in Reading, after that they are at the risk of the buyer. We do not charge for packing small packages; for the large ones we are obliged to make for trees or shrubs a charge is made to cover expense. Plants can be delivered by mail, but it is preferable in many cases that they go by express, for the plants will be enough larger and in enough better condition to pay for express charges.

Persons desiring Plants not mentioned in this Catalogue will please correspond. Our opportunities for getting rare native and cultivated Plants and Shrubs are unexcelled.

INTRODUCTION.

THERE is a growing demand for the kind of plants offered in this catalogue. The system of Bedding or Ribbon gardening has driven out the many very beautiful and interesting herbaceous borders that were seen in the old fashioned gardens. These herbaceous borders were not quite so showy, but far more interesting, and they required less skill to make a pretty display. Both systems have their place, and neither one should supersede the other. HARDY HERBACEOUS PERENNIALS are those plants the roots of which live year after year, and throw up new stems each year which bear flowers and fruit, then die down again in the fall. ARRANGEMENT—place the large plants at the back or centre of the bed, the smaller ones on the edge, and those intermediate between; sufficient room should be given each plant to grow to perfection. In making a selection be careful to select such as will give a continuous bloom all through the season; *it is best for those not acquainted with this class of plants to leave the selection with us.* In sending your orders state where the collection is to be placed. WILD GARDEN.—A person having a bit of native growth, as a grove, stream, or pond, can improve it wonderfully by the addition of such herbaceous plants as will flourish under the different conditions offered. Just imagine a grassy plot with clumps of *pœonies* scattered through it; the edge of a pond or stream with the showy *Hibiscus*, *Cardinal flowers*, or *Cassia;* moist shady woods with the *Dicentras*, *Blood root* or *Maidens hair ferns.* Any person can see for himself the beauties that could be added to such a place. ROCK WORK.—In our hot dry summers the rock work is seldom an advantage in the growing of Alpines; for most of them will do better in well drained soil in the open border; water should never settle and stand about them. In many cases a few rocks placed on the top of the ground around the plants will keep the earth cool and moist. CULTIVATION.—In planting be careful to arrange the plants so that they will have plenty of light when growing, unless the plant is one that requires a shady cool spot. (Plants requiring peculiar conditions are mentioned in the catalogue.) Dig the earth deep and beat it up fine for some distance around the plant; arrange the roots as naturally as possible, using care to have each fibre in contact with firmly compressed earth. In summer keep out weeds; stake those plants needing it, putting the stake so that it will be hidden by the foliage as much as possible, and be careful to arrange the plant as naturally as possible in trying. Cut off the fading flowers unless seeds are desired, if so, leave only the strongest flowers or stems. In winter it is best to cover beds with coarse strawy manure or some other mulch as cut straw or hay. This protects the plants, and they will be better for it the next season, if they be ever so hardy. Perennials will make large clumps and exhaust the soil about them in from 3 to 5 years; they should then be taken up, the roots divided and reset in a new position; this should be done in the fall after they are through blooming, or early in the spring, as soon as the ground is warm.

LIST OF

HARDY PERENNIAL PLANTS.

	Each.	Per doz.
ACHILLEA MILLEFOLIUM VAR. ROSEUM (PINK YARROW)..... Eu. & U. S., 2 ft., July. A pretty rose colored variety of the yarrow; will do well in any soil. Pretty for wild garden.	$0.15	$1.00
ACHILLEA PTARMICA FLORE PLENO (DOUBLE SNEEZEWORT) ..... Eu. 1½ ft., July. Double white; nice for bouquets; forces well.	.20	2.00
ACHILLEA TOMENTOSA (WOOLY MILFOIL)..... 9 in., May, July. Flowers very bright yellow, leaves finely cut and wooly; rockwork.	.20	2.00
ACHLYS TRIPHYLLA (OREGON MAY APPLE)..... Oregon, 18 in. Flowers in a spike, white, fragrant. Leaves large, three parted.	.25	
ACONITUM COLUMBIANUM..... Or., 3 ft., flowers blue, in a loose raceme.	.25	
ACORUS CALAMUS (SWEET FLAG)..... U. S., thick grass like leaves and aromatic medicinal roots. Bogs or moist garden soil.	.15	1.00
ACORUS CALAMUS VAR. VARIEGATUS (VARIEGATED S. F.)..... Leaves prettily striped with white and rose color: very pretty in moist border or bogs.	.25	
ACTEA ALBA (WHITE BANE BERRY) ..... U. S., 2 ft., May. Terminal spikes of white flowers, followed by pure white berries on bright red stalks; foliage graceful and pretty; moist shady spot.	.20	2.00
ACTEA SPICATÆ VAR. ARGUTA (CUT LEAVED BANE BERRY)..... Or., 1½ ft., foliage finely cut, fruit white, on red footstalks; moist shady spot.	.25	
ACTEA RUBRA (RED BANE BERRY)..... U. S., 2 ft., May. Flowers white in terminal spike, berries in large bunches, dark red, on slender red stems.	.20	2.00
ADENOSTYLUS NARDOSMYA..... Or., 2 ft. Flowers bell shaped, in several large clusters, waxy yellow, fragrant	.30	
ADONIS VERNALIS (SPRING ADONIS) ..... Eu., 18 in., April. Flowers large yellow; leaves finely divided; well drained soil.	.20	2.00
ÆTHONEMA CORDIFOLIUM (MT. LEBANON CANDYTUFT)..... Palestine, 8 in. Flowers rose colored, in clusters; rockwork.	.30	
AIRA VARIEGATA..... 6 in. A low gold and green striped grass, very pretty for borders and rockery.	.20	2.00

	Each.	Per doz.
AJUGA ALPINA (Bugle). Eng., 6 in., May. Flowers dark blue; plant forms a carpet of dark green on moist shaded ground or rockwork.	.25	2.50
AJUGA REPTANS var VARIEGATA (Variegated Leaf, B.). Leaves variegated with yellow, white and green; covers ground in cool, moist, rockwork or border.	.25	2.50
ALETRIS FARINOSA (Colic Root). E. U. S., 6 in, June. A spike of pretty white flowers rise from a cluster of thin narrow leaves; moist sandy peat in shade.	.20	2.00
ALISMA PLANTAGO (Water Plantain). U. S., 3 ft., July. Large pyramidal cluster of much branched fine stems, terminated with small white flowers, leaves ovate; bogs.	.20	2.00
ALLIUM (Leek) A very pretty and easily cultivated class of plants. The flowers are shades of white, blue, red and yellow, some with a pleasant fragrance, others with an odor of onions, which is the only objection to them: plant in deep rich loam somewhat moist, not wet.		
ALLIUM ACUMINATUM. Or., 10 in. Flowers deep rose.	.25	
ALLIUM CERNUUM (Nodding Allium). W. U. S., 1 ft. Flowers showy rose red.	.20	
ALLIUM COERULEUM (Blue Allium). N. Eu, 1 ft., June. Flowers dark blue.	.35	
ALLIUM MOLY (Golden Allium). So. Eu., 1½ ft. An old and beautiful garden plant, flowers large yellow	.15	1.00
ALLIUM CHÆNOPRASUM (Chives). No U. S., 6 in., June. An old garden plant used in salads; it starts very early in the spring, and is a very pretty shade of green, flowers purple.	.10	.75
ALLIUM STELLATUM (Starry Allium). W. U. S, 1 ft. Flowers in close heads lilac rose.	.20	2.00
ALTHEA ROSEA (Common Hollyhock). A very popular and handsome class of plants that has been greatly improved within a few years by cultivation. We have a very fine collection of the best double varieties of shades of red, yellow, purple, salmon, copper, and white. Plant in a rich garden soil, and divide roots once in two or three years.	.30	3.00
ALYSSUM SAXITALE var COMPACTUM (Dense Golden Tuft). So. Eu., 6 in., May. Flowers bright yellow; rockwork.	.25	2.50
AMARYLLIS FORMOSISSIMA (Jocobean Lily). So. Am., 1 ft., June. This plant has gone through the winter with a thick covering; best to take up in winter; flowers dark velvety crimson, six inches in diameter, and of a peculiar form.	.30	3.00
ANCHUSA ITALICA (Italian Alkanet). Italy, 4 ft., June, Aug. A strong growing plant with rough leaves and handsome blue flowers; common soil.	.25	
ANEMONÆ (Wind Flower) A very interesting class of garden plants; all do well in good garden soil, and have a season of bloom from Apr. to Nov.		
ANEMONÆ DELTOIDEA (Oregon Anemonæ). Similar to our common wind flower, but larger, and more showy; shaded rockworks.	.30	

	Each.	Per doz.
ANEMONÆ JAPONICA (Japan, A.). Japan, 2 ft., Sept. to winter. Flowers pink with yellow stamens, two inches in diameter.	.30	
ANEMONÆ J. var. HONORINE JOBERT. A variety of the last with pure white flowers and yellow stamens, flowers large, handsome, and of long duration at a season when there are few nice flowers.	.25	2.50
ANEMONÆ NEMOROSA (Wind Flower). U. S., 4 in., May. Very pretty and delicate foliage, and white flower; shady moist soil.	.15	1.00
ANEMONÆ PENNSYLVANICA (Penna. A.). A Strong grower in any good soil, flowers white; nice for wild garden.	.15	1.00
ANEMONÆ PULSATILLA (Pasque Flower). Eu., 8 in., May. Plant forms a tuft of finely divided, wooly, fern like leaves, from which purple flowers rise in May; one of the best.	.20	2.00
ANTENNARIA PLANTAGINIFOLIA (Mouse Ear). U. S., 4 in., Apr. Improved greatly by cultivation; forms a dense mat of wooly leaves and white heads of flowers on a slender stem very early in the spring; rockwork.	.15	1.00
ANTENNARIA MARGARITACEA (Pearly Everlasting). U. S., 1 ft., Aug. A silvery white wooly plant with pure white everlasting flowers.	.20	2.00
ANTHEMIS TINCTORIA (Yellow Chamomile). Eu., 2 ft., July to Nov. Leaves finely divided, flowers large, yellow; very desirable for its long season of bloom; does well in any soil.	.20	1.50
ANTHEMIS TINCTORIA var. ALBA (White Chamomile). Same as last, with white rays and yellow center.	.25	2.50
ANTHERICUM LILIAGO (St. Bernard's Lily). Eu., 2 ft., May, July. Narrow leaves and branched stems, with racemes of lily-like small white flowers.	.20	2.00
ANTHERICUM GRAMINIFOLIUM. Eu., 2 ft., July, Aug. Similar to last, but more branched, and later flowered.	.20	2.00
APIOS TUBEROSA (Ground Nut). U. S., 1 ft., Aug. A strong climber, with dark green pinnate leaves and close clusters of chocolate and purple flowers, very fragrant and pretty; nice in wild garden.	.20	2.00
APOCYNUM ANDROSÆMIFOLIUM (Dog Bane). E. U. S., 2½ ft., July. Branched stems with pink flowers; suitable for wild garden,	.20	2.00
APLECTUM HYEMALE (Adam and Eve). N. U. S., 10 in., summer. An interesting orchid; it throws up a large plaited leaf that lasts until the year after, when a spike of brown and purple flowers appears.	.30	3.00
AQUILEGIA (Columbine). One of the finest garden flowers both in foliage and flower, having a great variety of color. They should be propagated from seed every two years, as the old plants are liable to die out; plant in well drained garden soil.		
AQUILEGIA CŒRULEA (Rocky Mt. C.).	.35	3.00

	Each.	Per doz.
W. U. S., 3 ft., July. Flowers very large, a delicate blue and pearly white		
AQUILEGIA CANADENSIS (Wild C.)	.20	2.00
E. U. S., 2 ft., June, July. Improves greatly under cultivation; flowers red and orange		
AQUILEGIA CHRYSANTHA (Golden Spurred C.)	.30	3.00
W. U. S., 3 ft., July. Flowers of two shades of yellow, spurs very long.		
AQUILEGIA FORMOSA (Beautiful C.)	.30	
Or., 18 in., June. Flowers reddish orange.		
ARABIS ALPINA (Alpine Rock Cress)	.20	2.00
Alps, 8 in., May, June. Leaves whitish, flowers white and very profuse and early; suitable for rockwork.		
ARALIA HISPIDA (Bristly Sarsaparilla)	.20	2.00
E. U. S., 3 ft., June. Large pinnate leaves and thick clusters of yellowish white flowers, followed by bunches of dark blue berries; suitable for poor soil in wild garden.		
ARALIA NUDICAULIS (Wild Sarsaparilla)	.20	2.00
E. U. S., 1½ ft. Flowers greenish white on a stem under the large several times pinnate leaf; fruit black, in close clusters; wild garden.		
ARALIA RACEMOSA (Ginseng)	.30	
E. N. A., 4 ft., June. Flowers in racemed umbels; berries in cluster, black; a large plant, suited for wild garden.		
ARALIA TRIFOLIA (Ground Nut)	.15	1.00
E. U. S., 4 in., June. A pretty little plant for moist shaded spots, flowers fine, white, in a close round umbel; tuber eatable.		
ARENARIA CAPPILARIS	.25	
Or., 3 in. Leaves narrow, sharp and pubescent, flowers ½ in. in diameter		
ARENARIA FRANKLINI	.25	
Or., 3 in. Plant trailing, pubescent, flowers large, white; nice for rockwork.		
ARENARIA MACROPHYLLA (Large Leaved Sandwort)	.25	
Or., 6 in. Leaves wide, flowers large, white; moist shady spots on rockwork.		
ARETHUSA BULBOSA (Arethusa)	.30	3.00
E. U. S., 8 in., June. A very beautiful rosy pink orchid with flowers 1 in. long; grows naturally in wet mossy meadows.		
ARISÆMA DRACONTIUM (Green Dragon)	.25	2.50
N. U. S., 2 ft., June. Flower spathe green; fruit scarlet, in a large bunch. A very peculiar and interesting plant for wet shady spots or moist border.		
ARISÆMA TRIPHYLLUM (Jack in the Pulpit)	.20	1.50
U. S., 2 ft. Flowers in brown spathe, leaflets three; interesting and desirable for wet shady places, does well in moist open border		
ARMERIA VULGARIS (Thrift)	.25	2.00
Eu., 6 in., Summer. Flowers pink, they will dry well for winter decoration. One of the best plants for dry spot in rockwork or as an edging.		
ARNICA AMPLEXICAULIS (Clasping Leaved Arnica)	.25	
Or., 1 ft. Flowers yellow on leafy stems; moist rich border or base of rockwork.		

	Each.	Per doz.
ARNICA CORDIFOLIA (Heart Leaved A.) Or., 1½ ft., Aug Flowers on single stems, very large, 1½ in. in diameter.	.25	
ARNICA FOLIOSA (Leafy Arnica) Or., 1½ ft., Aug. Flowers corymbed, pale yellow.	.25	
ARTEMISIA ABROTANUM (Southern Wood) Eu., 2 ft., Aug Foliage very fragrant, finely devided glaucus.	.20	2.00
ARTEMISIA ABSINTHIUM (Wormwood) Eu., 3 ft. Whole plant strongly fragrant and bitter; used as a medicine.	.20	2.00
ARTEMISIA DRACUNCULUS (Tarragon) Eu , 3 ft Leaves aromatic; used as a condiment and for flavoring soups.	.25	2.00
ARTEMISIA STELLARIANA 6 in. Very pretty, finely cut, whitish, feathery foliage; pretty in wild garden; nice for bouquets.	.15	1.00
ASARUM CANADENSÆ (Canada Snakeroot) N. U. S., 6 in., May. Leaves kidney shaped; flowers curious brownish purple: roots strongly aromatic like ginger.	.20	2.00
ASARUM CAUDATUM (Tailed Snake Root) Or. Similar to preceding, flowers have longer appendages.	.25	
ASCLEPIA CORNUTA (Milkweed) E. U. S., 4 ft., July. Flowers dull purple, in large umbels, interesting in wild garden; grows in any soil.	.20	1.50
ASCLEPIAS INCARNATA (Swamp Milkweed) E. U. S., 4 ft. Flowers rose purple, in large umbels, leaves narrow; does well in bogs or the open border.	.20	1.50
ASCLEPIAS OBTUSIFOLIA (Blunt Leaved Milkweed) 3 ft., Aug. Flowers dark maroon, in a single large umbel at top of stem, leaves opposite with crimped margins, dark green. A pretty plant for any soil.	.25	2.00
ASCLEPIAS QUADRIFOLIA (Four Leaved M.) E. U. S., 2 ft., June. Leaves pointed and narrow in whorls, flowers rose and white, in umbels, fragrant, one of the prettiest; open border.	.30	2.50
ASCLEPIAS TUBEROSA (Pleurisy Root or Butterfly Weed) E. U. S., 2½ in., June, Sept. One of the showiest garden flowers, very effective in masses. The stem branches at top and bears many umbels of very brilliant orange flowers, if these are plucked as soon as faded the season of blooming will be continued. It requires light sandy soil, such as few other plants will grow in.	.20	1.50
ASCLEPIAS VECTICILLATA (Whorled Milkweed) E U S., 2 ft., June, July Leaves very narrow, many in a whorl, flowers delicate white, very striking and pretty plant; poor soil.	.25	2.00
ASPERULA ODORA (Woodruff) No. Eu., 8 in., June. Waldmeister of the Germans. Stems slender, leaves in a whorl, flowers white; moist cool soil.	.20	
ASPHODELUS LUTEUS (Yellow Asphodel) So. Eu., 2 ft., June. Leaves narrow, light green; flowers yellow, in a long spike.	.30	
ASTER (Starwort or Aster) A class of plants that bloom when there are few flowers, they are nearly all of easy cultivation, and do well in any garden soil; many are very showy, and all are pretty.		

	Each.	Per doz.
ASTER CONCOLOR (Grayish Leaved A.)	.25	
E. U. S., 2 ft., Sept. Flowers purple, in long racemes.		
ASTER DOUGLASI (Douglass A.)	.15	1.00
Or., 4 ft., Sept. Flowers large, blue; suitable for wild garden.		
ASTER MULTIFLORUS (Many Flowered A)	.15	1.00
E. U. S., 2 ft., Sept., Nov. Forms a compact bushy plant, covered with many small white flowers that last for some time.		
ASTER NOVA ANGLIÆ (New England A.)	.20	1.50
U. S., 5 ft., Sept. Forms a large, compact cluster of fragrant dark purple flowers, with yellow centers. One of the showiest asters; requires a stake the flower clusters are so large and heavy; any good soil.		
ASTER NOVA ANGLIÆ var. COCCINEA (Scarlet N. E. A.)	.30	
A scarlet variety of the foregoing, and equally desirable.		
ASTER OBLONGIFOLIUS (Oblong Leaved A.)	.20	1.50
N. U. S., 2 ft., Sept. Flowers violet, yellow center, forms a neat bushy plant.		
ASTER PATENS	.25	
E. U. S., 3 ft., Sept. Flowers bright blue.		
ASTER RADULINUS	.25	
Or., 2 ft. Flowers white, large and handsome, plant pubescent.		
ASTER SPECTABILIS	.25	2.00
E. coast U. S., 2 ft, Sept. Nov. One of the finest flowers, very large deep violet blue; sandy soil.		
ASTILBE JAPONICA (Japan Astilbæ or Spiræa)	.20	2.00
Japan, 1 ft., June. Leaves pinnate, dark glossy green, followed by pyramidal clusters of fine white flowers; both foliage and flowers are handsome; fine for forcing.		
AUBRETIA DELTOIDEA (Deltoid Aubretia)	.25	
So. Eu., 4 in., May. Leaves grayish, evergreen, flowers purple; fine for rockwork.		
BAPTISIA AUSTRALIS (Blue False Indigo)	.20	2.00
E. U. S., 2 ft., June. Flowers in long racems, blue; foliage, glaucus green, plant compact bushy; any soil.		
BAPTISIA LEUCANTHA (White False Indigo)	.25	2.00
U. S., 2 ft., July. Flowers white, in short racemes at end of branches; any soil.		
BAPTISIA LEUCOPHEA (Cream Colored Baptisia)	.25	2.50
E. U. S. Flowers one inch long, in racemes one foot long; plant hairy.		
BAPTISIA TINCTORIA (Wild Indigo)	.20	2.00
E. U. S., 2 ft., July. Flowers yellow, foliage dark green; sandy soil.		
BETONICA GRANDIFLORA (Betony)	.30	
Siberia, 2 ft., July. Flowers purple, large.		
BOCCONIA JAPONICA (Bocconia)	.25	2.00
Japan, 8 ft., Aug. A plant with large handsome glaucous leaves and immense pyramidal cluster of cream colored flowers; nice for foliage bed and wild garden.		
BOLANDRA OREGONA	.25	
Or. Flowers bell shaped, stem spreading.		
BOLTONIA LASIQUAME (Boltonia)	.25	2.50
W. U. S., 3 ft., Aug. Oct. Leaves narrow, glaucous; flowers aster		

	Each.	Per doz.
like, light lavender; plant rises as a simple stem, but has a much branched head.		
BOYKINIA ACONITIFOLIA (Aconite Leaved Boykinia)..... Alleghany Mts., 2 ft., July. Flowers in terminal cymes, white, foliage lobed; rare.	.30	
BRASENIA PELTATA (Water Shield)..... U. S., Japan, etc. An interesting aquatic with shield shaped leaves; stems thickly covered with transparent mucilage, flowers small, purple: ponds or slow running streams.	.25	
BRODIÆA GRANDIFLORA..... Or., 4 to 6 in. Flowers large, rose color or purple; bulb; plant in deep rich soil.	.20	
BRODIÆA HOWELLII..... Or.	.25	
BRODÆA LACTEA..... Or., 1½ ft. Flowers early, and numerous, white with green mid vein, or purplish.	.25	
BRODÆA MULTIFLORA..... Or. 1½ ft. Flowers in umbels, numerous.	.25	
CACALIA ATRIPLICIFOLIA (Pale Indian Plantain)..... Middle U. S., 4 ft., July, Aug. Flowers in large flat cymes, creamy white, leaves glaucous, large and deeply toothed; foliage bed or wild garden; good garden soil.	.25	
CALAMAGROSTIS NUTTALIANA..... E. U. S., 6 ft., Aug. A pretty oramental grass for winter decoration.	.25	2.00
CALLA PALUSTRIS (Wild Calla)..... E. U. S., 8 in., June, Aug. A very pretty bog plant with white flowers, similar to calla lily: bunches of brilliant red berries and heart shaped glossy light green leaves.	.25	2.00
CALOCHORTUS ELEGANS..... Or., 6 to 8 in. Flowers greenish white with purple base.	.30	
CALOCHORTUS TOLMEI..... Or., 1 ft. Stem branched, flowers large white, margined lilac; petals fringed.	.30	
CALOPOGON PULCHELLUS (Calopogon)..... E. U. S., 1 ft., June and July. A very handsome orchid; flower 1 in. in diameter, several on a stem, rose purple, bearded with white, yellow and purple hairs; mossy bogs.	.25	2.00
CALTHA PALUSTRIS (Marsh Marigold)..... E. U. S., 8 in., May. A bright and pretty yellow flowered plant, with kidney shaped glossy dark green leaves; shady wet soil.	.20	1.50
CALTHA BIFLORUS..... Or. Leaves kidney shaped, flowers white, two in number.	.25	
CALYPSO BOREALIS (Northern Calypso)..... No. U. S., 4 in. A handsome orchid, with flowers very large for plant; flowers variegated, pink, purple and yellow; damp mossy shaded bogs.	.20	1.50
CAMASSIA ESCULENTA (Edible Quamash)..... Or., 1 ft. A bulbous plant, with very large and showy purple flowers; well drained soil.	.25	
CAMPANULA CARPATICA (Carpathian Hare Bell)..... Eu., 1 ft., June, Aug. Flowers bright blue, bell shaped, upright	.20	2.00

	Each.	Per doz.
on slender stem, foliage fine light green, a very pretty compact dwarf plant; borders or rockwork.		
CAMPANULA CARPATICA VAR. ALBA. A white variety of the last.	.30	
CAMPANULA DIVARICATA (BRANCHING HAREBELL). Alleghanies, 1½ ft., July. Much branched, bearing many small bell shaped blue flowers; borders.	.30	
CAMPANULA PERSICÆFOLIA (PEACH LEAVED H.). Eu., 2 ft., July. Has neat tufts of narrow dark green leaves and large bell shaped flowers, blue or white, on long stem.	.20	2.00
CAMPANULA PUNCTATA. 3 ft., June. Rough dark green leaves, and numerous large dark blue flowers at top of leafy stem.	.25	
CAMPANULA ROTUNDIFOLIA (HAREBELL). U. S. and Eu., 2 ft., July, Aug. Narrow foliage, and many medium sized broadly bell shaped blue flowers, one of the prettiest for general cultivation, and very nice for rockwork.	.20	1.50
CASSIA MARILANDICA (WILD SENNA). E. U. S., 5 ft., July, Aug. A handsome plant with acacia like foliage and masses of bright yellow and black flowers, very effective in masses; does well in any situation, especially fine to make an effect in the wild garden on edges of streams, etc.	.20	1.50
CATANANCHE CŒRULEA (CUPIDORE). So. Eu., 1 ft., July. Flowers in varieties, several shades, blue, purple, and white. flowers dry well for winter decoration; well drained soil.	.25	
CENTAUREA CALOCEPHALE. 3 ft., June, Aug. A neat growing upright plant with deeply lobed lower leaves and medium sized heads of dark magenta; flowers for a long season, very pretty and desirable.	.35	3 50
CENTAUREA NIGRA (KNAPWEED). Eu., 2 ft., July, Sept. Many small heads of purple flowers; good for wild garden, in poor soil.	.20	1.50
CENTRANTHUS RUBER (RED VALERIAN). So. Eu., 2 ft. All summer, many heads of delicate light red flowers; foliage smooth, light green.	.25	
CENTRANTHUS ALBA. A white var. of last.	.30	
CERASTIUM BURBESTEINI (BURBESTEINS MOUSE EAR). So. Eu., 6 in., May, July. Forms a mass of fine light green leaves, and handsome pure white flowers on slender stems.	.20	2.00
CHAMÆLIRUM LUTEUM (BLAZING STAR). U. S, 1 to 2 ft., June. Root tuberous, flowers white, in a raceme, on a long stalk.	.25	
CHEIRANTHUS MENZIESII. Or., 6 to 8 in. Leaves densely pubescent, flowers bright purple.	.25	
CHIONODOXA LUCILIÆ (SNOW GLORY). Asia Minor, 6 in., Apr. May This plant is destined to become very popular as an early spring flowering bulb. The flowers are of a very beautiful shade of blue, with a white eye; they are ¾ of an in. in diameter, in a spike of from 3 to 20 flowers. All who have seen it speak of it in the highest praise. It is perfectly hardy.	.25	2 00

	Each.	Per doz.
CHRYSANTHEMUM INDICUM (Chinese Chrysanthemums)..... China and Japan, 1½ to 2 ft., Oct. to Winter. Valuable for their great variety of colors, ranging from white to buff, pale yellow, deep yellow, bronze, orange, scarlet, rose, lilac, purple, crimson, and intermediate shades; also for their late blooming at a time when there are few flowers, and for their long season of bloom. In the border a rich light loamy soil slightly shaded is the best; divide roots each spring, plant early, and water when very dry.		

Group of Chrysanthemums.

JAPANESE VARIETIES..... This class have the petals peculiarly twisted and thread like, and very rich colors.	.25	2.50
Early Red Dragon. Deep crimson and gold.....		
Eleonore. Amaranth and white.....		
Fulton. Bright golden yellow.....		
Golden Dragon. Petals twisted and curved, often four inches long, flowers a rich golden yellow, in clusters, habit dwarf, very fine...		
James Salter. Lilac and yellow.....		
Jonathan. Rose, violet and white, center yellow, extra.		

	Each.	Per doz.
La Chinoise. Maroon and gold		
M. Castel. Flowers fiery crimson and rose, large with long twisted petals.		
Magnum Bonum. Pink.		
Mons C. Huber. Red, crimson and yellow		
M. Roux. Flowers very deep reddish crimson, striped white.		
Mons. Wm. Bull. Deep crimson, tipped with gold.		
Parasol. Deep bright chamois color, a peculiar shade ; very large.		
Sesostris. Chestnut	.20	2.00
GENERAL COLLECTION. Those marked with a * small flowered varieties.		
*Alba Perfecta. Pure white		
*Comete Biela. Full double golden yellow and deep orange, very showy		
*Perle des Beauties. Dark crimson, regular outline, full double		
*Sanguineum. Blood red, free bloomer		
*Bob. Crimson		
C. H. Glover. Very fine yellow		
*Circle. Pink and lemon		
Empress of India. White		
Geo. Glenny. Golden yellow		
Gloria Mundi. Yellow		
Mrs G. Rundle. White		
Pink Perfection. Pink		
Princess Louise. Rose		
Semiramis. Peach		
Temple of Solomon. Golden yellow		
Venus. Rose		
Virgin Queen. White		
White Princess. White		
CHRYSOPSIS FALCATA (Golden Aster) U. S., 10 in., Aug. Flowers bright yellow, in large flat bunches, plant very wooly ; dry sandy soil.	.25	2 00
CHRYSOPSIS MARIANA U. S., 1 ft., Aug. Oct. Not so silvery as last, with smaller leaves and larger flower heads.	.25	2.00
CHRYSOPSIS VILLOSA (Sticky Golden Aster) Or. Plant sticky, flowers yellow.	.25	
CLAYTONIA CAROLINIANA (Carolina Spring Beauty) E. U. S., 6 to 8 in., April and May. Root tuberous ; flower delicate pink, in racemes ; open in sunshine : moist rockworks.	.15	1.00
CLAYTONIA VIRGINIANA (Virgina Spring, B.) Similar to last. Leaves narrower.	.20	1.50
CLEMATIS. A very ornamental class of plants, including erect growing species of several colors, and climbers of a great variety of color and form. All are not strictly herbaceous, for they have a somewhat shrubby stem from which the long yearly growth grows. They require a rich cool soil to come to their greatest perfection. The following list includes a good selection of garden varieties of different colors and seasons of bloom.		
Alexandria. Summer and Autumn. Reddish violet, broad petals	.75	
Countess of Lovelace. Summer and Autumn. Bluish lilac, double	.75	
Flamula. Summer and Autumn. Small flowers, white, fragrant	.50	

	Each.	Per doz.
FORTUNEII. Spring. White, double	.75	
JACKMANNII. Summer and Autumn. Violet, purple, large	.75	
LANUGINOSA CANDIDA. Summer and Autumn. White	.75	
LUCIE LEMOINE. Summer. White, double	.75	
MISS BATERMAN. Spring. White	.75	
SIEBOLDII. Summer and Autumn. White, violet center	.75	
SOPHIA. Spring. Pale blue, white center	.75	
STANDISHII. Spring. Dark blue	.75	
STAR OF INDIA. Summer and Autumn. Reddish plum, red bars	.75	
THE QUEEN. Spring. Delicate lavender	.75	
VITICELLA. Summer and Autumn. Purple	.50	

Clematis.

CLEMATIS COCCINEA (SCARLET CLEMATIS) .75

So. W. U. S., June, Aug. A recent introduction of great value; a strong climber, with light green foliage and showy bell shaped brilliant scarlet flowers produced in great profusion.

CLEMATIS CRISPA (CRISPED LEATHER FLOWER) .35

S. U. S. A strong grower, with long lilac flowers, fragrant.

CLEMATIS DOUGLASII (DOUGLAS CLEMATIS) .35

Or., 1 ft., April, May. Single flowers, nodding, deep purple; foliage finely cut.

CLEMATIS GRAVEOLENS (HEAVY SCENTED, C.) .35

Central Eu., 15 ft., all summer. Very strong climber, free bloomer, hardy, with fine foliage; flowers yellow, 1½ in. in diameter.

CLEMATIS LIGUSTICIFOLIA .30

Or. A climber with large clusters of white flowers.

CLEMATIS RECTA (UPRIGHT VIRGIN'S BOWER) .25 2.00

	Each.	Per doz.
Eu., 4 ft., June. Upright growing, with large panicles of white flowers.		
CLEMATIS VERTICILLARIS (Whorled C.)	.30	
N. U. S., Apr. and May. Flowers large bluish purple; fine for rockwork.		
CLEMATIS VIRGINIANA (Virgin's Bower)	.25	1.50
E. U. S., 10 ft., Aug. A strong climber, with dark green foliage and pretty white flowers; the bunches of seeds have long wooly tufts, making them very ornamental for winter decoration.		
CLINTONIA BOREALIS (Northern Clintonia)	.25	2.00
N. U. S, 8 in., June. Flowers yellow, lily shaped, leaves similar to Lily of the Valley; fruit bright blue; moist shady spots.		
COLLINSONIA CANADENSIS	.25	
N. U. S., 3 ft., Aug. Pyramidal cluster of yellow flowers, large leaves; moist rich spot.		
COMMELINA VIRGINICA (Day Flower)	.25	2.00
W. U. S., 1 ft, all summer. Foliage narrow, light green; flowers opening only in the sun, and appearing from a peculiar involucre.		
CONVALLARIA MAJALIS (Lily of the Valley)	.25	2.00
Alleghanies, 8 in., May. A well known plant, very fragrant.		
CONVOLVULUS OCCIDENTALIS	.25	2.00
Or., 5 ft. Flowers pinkish; dry soil.		
COREOPSIS LANCEOLATA (Lance Leaved Tick Seed)	.20	1.50
W. U. S, 2 ft, all summer. Plant forms a broad clump of slender stems, with narrow leaves and large bright yellow flowers; one of the best perennials.		
COREOPSIS PALMATA	.25	
W. U. S, 3 ft., July. Leaves finely divided, flowers yellow.		
COREOPSIS ROSEA (Rose Colored Tick Seed)	.25	2.00
E. U. S., ½ ft. Branching, leaves fleshy, narrow; flowers rose colored, with yellow centers; moist sandy soil.		
CORNUS CANADENSIS (Bunch Berry)	.15	1.00
U. S., 6 in., June. Four broad leaves in a whorl at top of slender stem, and large white flower in center; berries brilliant red; moist shady soil.		
CORYDALIS NOBILIS (Noble Corydalis)	.50	
Siberia, 1 ft., Apr. Flowers brilliant yellow, in thick clusters. The tops of this plant disappear in summer; the roots should not be disturbed.		
CORYDALIS SCOULERI	.30	
Or. Flowers rose colored, with long spur, leaves several times, pinnate, handsome; shady rich soil.		
CYPRIPEDIUM.		
These plants are very handsome and interesting, but do not last long in border; a bed should be prepared in a moist shady spot of ½ sand, ½ leaf mould or peat, and ½ rich loam; after the plants are set out they should not be disturbed.		
CYPRIPEDIUM ACAULE (Stemless Ladies Slipper)	.25	2.00
1 ft., June. Flowers with large white inflated lip veined purple, leaves large, plaited.		
CYPRIPEDIUM CANDIDUM (Small White, L. S)	.30	
W. U. S. Flowers white, on leafy stem		
CYPRIPEDIUM PARVIFLORUM (Small Yellow, L. S.)	.30	
1½ ft, June. Flowers yellow, fragrant, terminating leafy stem.		

	Each.	Per doz.
CYPRIPEDIUM PUBESCENS (Yellow, L S.)..... 2 ft., July. Flowers similar to last, but larger.	.30	
CYPRIPEDIUM SPECTABILE (Showy, L S.)..... Very handsome: a strong growing leafy stem, bears 2 or 3 large flowers, with pure white inflated lip blushed crimson, one of the finest of our native flowers	.50	

Single Dahlia Paragon.

DAHLIA

The roots of the Dahlia must be taken up and stored in dry earth or ashes through the winter; they require high cultivation. *Any person desiring varieties not mentioned in these lists will please let us know. We can usually furnish any variety in the market at the market price.*

DAHLIA JUAREZII (Cactus Dahlia)..... A new and distinct variety; the flowers have long petals similar in appearance to a cactus flower, the color is a deep purplish crimson; a free bloomer, and very fine novelty.	.75	
NEW SINGLE DAHLIA These are new, and are a rival in beauty of color with the double varieties; the flowers have a single row of broad petals, last well as a cut flower, and are produced so abundantly as to hide the foliage.		
Paragon. Darkest velvety maroon, with scarlet shadings around each petal.....	.50	
Lutea. Pure yellow, dark orange center.....	.50	

	Each.	Per doz.
DIOSCOREA VILLOSA (Wild Yam Root)	.25	2.00
W. U. S., July. A climber, with heart shaped leaves, and greenish yellow flowers; a pretty climber; fine for wild garden or rockery.		
DROSERA (Sundew)		
A peculiar and interesting genus of bog plants, the leaves are covered with sticky glandular hairs, that hold any small insect, and then devour him. They are not only interesting, but pretty, and any lover of wild plants should have them in the garden; they grow naturally in wet, muddy, or sandy bogs.		
DROSERA ANGLICA	.30	
Or., 6 in. Flowers white, ¾ of an inch in diameter, leaves oblong.		
DROSERA FILIFORINIS (Thread Leaved Sunder)	.30	3.00
E. U. S., 1 ft. Leaves threadlike, flowers ½ inch in diameter, purple rose color, moist sand, cold frame in winter.		
DROSERA LONGIFOLIA (Long Leaved, S.)	.15	1.00
E. U. S., 2 in., July, Aug. Flowers small, white, leaves narrow.		
DROSERA ROTUNDIFOLIA	.15	1.00
E. U. S., 2 in., July. Leaves round, flowers white.		
ELODES VIRGINICA (Marsh St. John's Wort)	.20	1.50
E. U. S., 1 ft., July, Aug. Flowers rose colored; bogs.		
EPILOBIUM AUGUSTIFOLIUM (Great Willow Herb)	.25	2.50
U. S., 4 ft., July, Sept. Flowers in long spikes, rose purple, showy; wild garden.		
EPIMEDIUM MACRANTHUM (Large Flowered Barren Wort)	.25	2.50
Japan, 8 in., May. Leaves handsome, pinnate, tinged red when young; flowers white, with long spurs; peculiar.		
ERIANTHUS RAVENNÆ (Ravenna Grass)	.35	2.50
So. Eu., 8 ft., Sept. Forms graceful clumps of light green leaves, from which tall handsome plumes are thrown up, which are useful for winter decoration; fine in single clumps or as the center of a grass bed.		
ERIGERON BELLIDIFOLIUM (Plantain Leaved Flea Bane)	.20	1.50
2 ft., May. Has dark glossy leaves close to ground, and fine rayed purple aster like flowers on long stems, 1½ inches in dia.		
ERIOCAULON SEPTEMANGULARE (Pipewort)	.15	1.00
E. U. S., Aug. Grows on edges of sandy ponds; flower-head white, stem lengthens out as water deepens; leaves and root also very interesting.		
ERYNGIUM YUCCAFOLIUM (Rattlesnake Master)	.30	2.50
W. U. S., 3 ft. Leaves very similar to Yucca, with edges fringed with bristles, flowers white in several round heads at end of long stem.		
ERYTHRONIUM AMERICANUM (Dogtooth Violet)	.15	1.50
U. S., 9 in., May. Leaves mottled with purple; flowers lily shaped, yellow, very pretty; deep rich soil.		
ERYTHRONIUM GIGANTEUM	.25	
Or. Flowers very large, white with yellow base.		
ERYTHRONIUM GRANDIFLORUM	.25	
Or., 8 in., May. Similar to last but larger flowered.		
EULALIA JAPONICA var. VARIEGATA (Variegated Eulelia)	.50	
Japan, 6 ft. Foliage banded very distinctly and prettily with white forms, a tall and graceful clump; the plumes are large and very handsome for winter decoration.		

	Each.	Per doz.
EULALIA JAPONICA VAR. ZEBRINA (ZEBRA STRIPED, E.). Japan. Variegations in this are yellow and run *crosswise*, very curious and effective; plumes same as last; protect both a little in winter.	.50	
EUPATOREUM (THOROUGHWORT). Plants with mostly white flowers, coming into flower at a time when few flowers are to be had; many are nice for bouquets, and all are very effective in clumps, in the border or wild garden.		
EUPATOREUM ARGERATOIDES (WHITE SNAKE ROOT). U. S., 3 ft., June, July. Flowers fine white, very good for cutting.	.25	2.50
EUPATOREUM ALBUM (WHITE, T.). 2 ft. Leaves narrow, deeply toothed, flowers white.	.25	2.50
EUPATORIUM AROMATICUM (AROMATIC SNAKE ROOT). 2 ft. Leaves ovate, thickish heads, large plant, slender; poor soil, wild garden.	.25	2.50
EUPATORIUM FRASERI (FRASER'S T.). 4 ft., Sept. Foliage light green, flower heads in clusters, pure white.	.20	2.00
EUPATORIUM HYSSOPIFOLIUM (HYSSOP LEAVED, T.). E. U. S., 2 ft. Leaves very narrow, flowers white.	.25	
EUPATORIUM PURPUREUM (PURPLE, T.). E. U. S., 5 ft., Aug. Leaves in a whorl, petioled, flowers in a large flat head, red purple, very effective in a mass; will grow in wet soil; fine for wild garden.	.20	2.00
EUPHORBIA COROLLATA (FLOWERING SPURGE). U. S., 3 ft., July, Oct. Terminal umbels of pure white floral envelopes, appearing like flowers, fine for cutting; does well in any soil; best in a rich sandy loam.	.25	
FESTUCA GLAUCA (BLUE FESCUE GRASS). So. Eu., 6 in. Leaves fine, fleshy, forming a dense tuft of pale blue or lavender tint; fine for edging; cut out flower stems when they appear.	.25	2.50
FRITILLARIA LANCEOLATA (LANCE LEAVED FRITILLARY). Or., 1 ft., July. Bulbous flowers dark purplish brown, variegated white and yellow, in a cluster at the top of stem; deep, rich, moist slightly shaded soil.	.15	1.50
FRITILLARIA PUDICA (MODEST FRITILLARY). Or., 8 in. Flowers solitary deep yellow.	.15	1.50
FUNKIA LANCEOLATA (NARROW LEAVED DAY LILY). Japan, 2 ft., Aug. Leaves narrow, forming a graceful clump of dark green foliage; flowers light purple, in a raceme.	.20	1.50
FUNKIA OVATA. Similar to last, but leaves are wider, and flower several weeks earlier.	.20	1.50
FUNKIA SUBCORDATA (WHITE DAY LILY). Japan, 2 ft., all summer. Flowers tubular, white, and very fragrant, leaves large, heart shaped, of a pretty, light yellowish green.	.30	3.00
GALIUM BOREALE (INFANTS BREATH). June, July, 2 ft. A plant with narrow light green leaves and very fine flowers; useful in bouquets.	.20	1.50
GENTIANA ACAULIS (STEMLESS GENTIAN). Alps, 3 in., May. Leaves dark green, forming a close mat; flowers large, vase formed, of a rich porcelain blue; light sandy soil or rockwork, with good depth of soil.	.30	

	Each.	Per doz.
GENTIANA ANDREWSII (Closed, G.) E. U. S., 1½ ft., Aug. Sept. Flowers dark blue, handsome; peculiar in not opening; light sandy loam.	.20	2.00
GAULTHERIA PROCUMBENS (Checkerberry) E. U. S., 4 in., Aug. Flowers white, bell shaped; leaves pleasantly aromatic; fruit pink, eatable.	.20	2.00
GERANIUM INCISUM Or. Leaves finely cut; flowers 1 in. in diameter, deep purple.	.30	
GERANIUM MACULATUM (Wild Cranebill) U. S., 2 ft., June, July. Flowers purple, foliage handsome; rich cool soil.	.25	2.00
GENISTA TINCTORIA (Wood Waxen) Eu., 1 ft., June, July. A plant with something the appearance of the "scotch broom," but less upright, it has a rich glossy green stem and foliage, and very bright yellow pea shaped flowers, and will grow in the moist barren situations, covering the ground completely, and making a surface of brightest yellow when in bloom; rare in cultivation.	.25	2.50
GEUM RIVALE (Water Avens) E. U. S. Flowers purple; fruits with long feathery tail; foliage handsome.	.25	2.50
GEUM TRIFLORUM (Three Flowered, A.) N. U. S. Foliage grayish, finely cut; fruit very handsome all summer.	.35	
GOODYERA MENZIESII (Menzies Goodyera) Or., 10 in., Aug. Flowers in narrow spike, white; leaves very handsome, dark green, veined with light green and white. An orchid, fine for wardian cases; plant in moist soil under evergreens.	.30	
GOODYERA PUBESCENS (Rattlesnake Plantain) E. U. S., 10 in Leaves lighter colored and more pointed than last; treat in same way.	.25	2.50
GOODYERA REPENS (Creeping Goodyera) E. U. S., 6 in. Leaves dark green, veined white, very pretty; to be treated same as others; all very pretty in fernery or wardian case.	.20	2.00
GYPSOPHYLLA PANICULATA Forms a large spreading plant with much branched fine stems and many small white flowers; fine for bouquets, and dries well for winter decoration; foliage glaucous.	.30	
HABENARIA (Fringed Orchis) A genus of the orchid family that includes many very handsome flowers, and some rather inconspicuous, but all are interesting as members of this very remarkable family. They require the same treatment as the Cypripediums.		
HABENARIA BLEPHARIGLOTTIS (White, F. O.) N. U. S., 1 ft., July. Flowers in spikes, pure white, and prettily fringed.	.25	2.00
HABENARIA CILIARIS (Yellow, F. O.) 2 ft., July, Sept. Flowers bright yellow, beautifully fringed, large and very handsome.	.25	
HABENARIA ELEGANS Or., 1½ ft. Spike dense, many flowered; flowers greenish.	.30	

	Each.	Per doz.
HABENARIA FIMBRIATA (Purple Fringed, O.) E. U. S., 2 ft., July. Flowers lilac purple, beautifully fringed, spike 2 to 6 in. long.	.25	2.50
HABENARIA GRACILIS Or., 3 ft. Flowers numerous, in long spike, white.	.30	
HABENARIA LASCERA E. U. S., 2 ft., July. Flowers in long spikes, greenish, but handsomely fringed.	.25	2.00
HABENARIA LEUCOSTACHYS Or., 3 ft. Flowers large, and many in a spike.	.30	
HABENARIA PSYCHODES (Butterfly, O.) E. U. S, 1½ ft. Flowers large, fringed rose; purple, in spikes; very handsome.	.25	
HABENARIA UNALASCHENSIS Or. Flowers in open spike, white ; leaves narrow.	.25	
HABENARIA VIRIDIS (Green, O.) Flowers in narrow spike, greenish, not handsome.	.15	1.50
HELENIUM AUTUMNALE (Sneeze Weed) E. U. S., 3 ft. Flowers in corymbs, yellow, and handsome.	.30	
HELIANTHUS DECAPETALUS (Perennial Sunflower) E. U. S., 5 ft., Sept. Flowers yellow, like a small sunflower, in great profusion on top of leafy stem.	.20	1.50
HELIANTHUS DIVARICATUS E. U. S., 4 ft., Sept. Stem simple or slightly branched ; flowers yellow.	.25	2.50
HELIANTHUS GIGANTEUS W. U. S., 8 ft., Sept. Oct. A very tall plant with dark purple stems, dark green leaves, and a large number of medium size yellow flowers on top.	.25	2.50
HELIANTHUS MAXIMILIANI (Maximilians, S.) W. U. S., 6 to 8 ft. Throws up long simple stems with narrow leaves and several large flowers at end of stem, that are not injured by ordinary frosts ; one of the best.	.20	2.00
HELIANTHUS MULTIFLORUS FLORE PLENO (Double Perennial Sunflower) A very fine plant, re-introduced to cultivation, the flowers are full double, 3 in. in diameter, of a handsome golden yellow shade ; it will be very popular for corsage wear ; plant is 4 ft. high, and continues in bloom from Sept. until frost.	.50	
HELIANTHUS ORGYALIS (Graceful Sunflower) W. U. S., 8 ft., Sept. Oct. One of the handsomest plants of the genus, the leaves are smooth, narrow, and drooping, growing very closely on the stem, giving it the appearance of a graceful plume; the flowers are numerous, bright yellow, and very large.	.30	2.50
HELIANTHUS TRACHÆFOLIUS E. U. S., 4 ft., Sept. Stems loosely branched, with many medium sized flowers, yellow.	.25	
HELIOPSIS LÆVIS 5ft., Aug. Oct. Flowers large, a very pretty shade of deep yellow.	.25	
HELEBORUS NIGER (Christmas Rose) Eu., 1 ft., Apr. Flowers 2 to 4 in. in diameter, white with yellow stamens, flowers buds tinged rose, leaf bright glossy green; plant in protected shaded situations ; a very handsome plant.	.50	

	Each.	Per doz.
HEPATICA ACUTILOBA	.20	
E. U. S., 6 in., Apr. Flowers blue; leaves three lobed, the lobes pointed; very pretty and early flower; should be planted in a shaded spot in good soil or on shaded rockwork.		
HEPATICA TRILOBA (Liver Leaf)	.15	1.50
Similar to last, with rounded lobes to leaf.		
HESPERIS MATRONALIS ALBA (White Rocket)	.25	
Eu., 2 ft., June. Flowers in spikes, white, fragrant; rich garden soil.		
HESPERIS MATRONALIS FLORE PLENO (Dbl. Rocket)	.50	
A double variety of the last; very desirable.		
HIBISCUS FLAVESCENS	35	3.00
3½ ft., Sept. Throws up several leafy stems, from the ends of each stem flowers 8 in. in diameter, white with dark crimson throat, appear in succession for several weeks; a magnificent flower. This with the other two following should be in every collection. They do well in almost any good soil, especially if a little moist; will grow in wet land. HIBISCUS CALIFORNICUS has not proved hardy with us.		
HIBISCUS MILITARIS	.25	2.50
U. S., 6 ft. Flowers 3 in. in diameter, white, tinged rose; leaves medium size, but very pretty; makes a large plant.		
HIBISCUS MOSCHUETOS (Marsh Mallow)	.25	2.00
E. U. S., 4 ft., Sept. Flowers 6 to 8 in. in diameter, light rose color, and very showy.		
HORKELIA FUSCA (Small Flowered Horkelia)	.30	
Cal., 8 in. Leaves finely cut; flowers white.		
HOUSTONIA CŒRULEA (Bluets)	.15	1.00
E. U. S., 3 in. Another very pretty native, that is improved by cultivation; flowers light blue or lavender, with yellow eye; plant in border or rockwork		
HOUSTONIA SERPYLLIFOLIA (Thyme Leaved Bluets)	.25	
S. U. S., 6 in. Forms a mat of light green on moist rockwork; flowers blue.		
HYACINTHUS CANDICANS	.50	
This has been proven hardy after several years exposure. The stem is from 3 to 4 ft. high, with 20 or 30 large drooping pure white flowers.		
HYDROPHYLLUM CAPITATUM	.25	
Or. Leaves roundish, soft hairy; flowers violet; moist rich soil.		
HYDROPHYLLUM VIRGINICUM	.25	
E. U. S., 1 ft., May. Flowers in nodding clusters, violet, leaves divided.		
HYPOXIS ERECTA (Star Grass)	.20	1.50
E. U. S., 6 in., May. Several yellow flowers on a slender stem; leaves grass like; moist sandy soil.		
HYSSOPUS OFFICINALIS (Hyssop)	.20	2.00
So. Eu., 1½ ft. Flowers in numerous spikes, dark blue; a medicinal herb, mentioned in scripture		
HYSSOPUS OFFICINALIS var. ALBA	.20	2.00
A white flowered variety of last, both are fragrant.		
IBERIS (Perennial Candytuft)		
These species are all very pretty, the flowers are pure white, or		

	Each.	Per doz.
white turning purple, produced in great abundance, and lasting well as a cut flower. The leaves are evergreen and will come out brighter in the spring if covered in winter with litter. They all force well.		
IBERIS CORIFOLIA. So. Eu., May. Pure white	.25	2.00
IBERIS GIBRALTARICA (Gibralta Candytuft). June. Flower heads large, white, turning purple.	.25	
IBERIS SEMPERVIRENS. So. Eu., June. Flowers pure white.	.20	2.00
IRIS (Flower-de-luce or Fleur-de-lis). A genus that should be represented in every herbaceous border however small; they do well in any good garden soil, and show a variety in color that cannot be found in any other class of plants, including almost every combination of brown, blue, yellow, purple and many other peculiar shades. With a proper selection of varieties a continual succession of bloom will be kept up from May until Aug. They vary in height and habit from the dwarf tuberous *pumilla* and *cristata*, to the magnificent fibrous rooted *koempferii*. Some would be very fine for the wild garden.	.25	2.00
IRIS CRISTATA (Crested Dwarf I.). U. S., 6 in., May. Flowers light blue, fine for edgings or wild garden.	15	1.00
IRIS FLORENTINA (Florentina I.). So. Eu., 2 ft. Flowers fragrant, white, with yellow beard. The root stalk of this variety furnishes the orris root of commerce.	.25	
IRIS GERMANICA (German I.). Eu., June. Flowers range in varieties through shades of brown, yellow, white, blue and purple; they are very pretty. In making a selection we always take distinct varieties, of which we have about 20.	.25	2 00
IRIS KÆMPFERII (Kæmpfers I.). Japan. 3 to 4 ft., June, July. Too much cannot be said in praise of this superb flower; the habit of the plant is upright, neat and graceful, the foilage is dark green. The flowers range in color from white through all shades of blue to very rich dark purple, with gold markings, many are mottled and variegated in a most beautiful manner. The flowers are from 4 to 8 inches in diameter, many with two sets of petals, giving the flower a very regular outline; it varies from the common varieties of the Iris in not having the conspicuous crown or upright set of petals. Plant in good soil, fertilize freely, and divide plants every two or three years. We have seedlings from the best named varieties, some of which are as good, that we offer for less than the named varieties; we can supply 20 distinct seedling varieties.	.25	2.50
NAMED VARIETIES.		
Bride. Large, pure white	.25	
Caroline. Pink shaded lavender	.25	
Cleopatra. Deep purple, golden yellow center	25	
Clio. Red shaded purple, extra fine	.25	
Cordelia. Light, sky-blue, white center	.25	
Damio. Pink, veined white, 3½ ft.	1.00	

	Each.	Per doz.
DAIBERTZ. Deep indigo blue, semi double, 3 ft	1.00	
EMPEROR OF JAPAN. Maroon	1.00	
EMPRESS OF JAPAN. Lavender, veined white, 4 ft	1.00	
EXQUISITE. Blue, white and purple veined	.25	
FAIRY QUEEN. Light blue, white center	.25	
FUSIYAMA. White, striped purple, center purple, 4 ft	.25	
GAZELLE. Deep blue, light center	1.00	
ICHABAU. Light reddish purple, veined white, double, 3 ft	1.00	
IMPERIAL STANDARD. Purplish pink, mottled white, 4 ft	1.00	
IYEYAS. Purplish blue, 4 ft	1.00	
JAMES Y. MURKLAND. Delicate porcelain blue, turning to white, double flower, very large and fine	1.00	
MINISTER MORI. White laced pink	1.00	
MR. BUCHANAN. Light indigo blue, yellow eye, double	1.00	
MR. CHOTARS. Light blue, striped and motted white	1.00	
MURUSAKI. Purple, petals wavy	1.00	
OTENTOSAMA. Light purple, slightly blotched white, 4 ft	1.00	
OTHELLO. Richest deep purple and gold	.25	
PEARL. Pure white, 4 ft	1.00	
PERFECTION. White veined and mottled purple, 3 ft	1.00	
PRINCESS. Lilac finely veined blue, double	1.00	
PROF. THURBER. Purplish blue, mottled white, yellow eye, double	1.00	
ROBERT BUIST. Dark indigo blue, yellow eye, double	1.00	
SPECTRE. Light lavender, veined deep purple	.25	
VENUS. Pure white	.25	
VIRGINAL. White shaded, light purple	.25	
VIRGINALIS. Double white	1.00	
VULCAN. Very dark reddish purple	.25	
WATER NYMPH. White veined and shaded lavender, 4 ft	1.00	
IRIS PUMILLA (DWARF IRIS)	.25	2.00
4 in., May. Flowers deep violet; pretty for edgings.		
IRIS SIBERICA (SIBERIAN I.)	.20	1.50
4 ft., June. Flowers blue and white veined.		
IRIS TENAX (TOUGH LEAVED I.)	.25	
Or., 2 ft. Flowers purple, marked yellow; leaves narrow and stiff.		
IRIS TOLMIEANA (TOLMIES I.)	.25	2.00
W. U. S., 1½ ft., July. Flowers pale blue.		
IRIS VERNA (DWARF SPRING I.)	.30	
S. U. S., 6 in. Flowers violet; leaves narrow.		
IRIS VERSICOLOR (NARROW LEAVED I.)	.25	2.00
E. U. S., 2 ft. Flowers dark purple; leaves narrow; swamps.		
IRIS VIRGINICA (VIRGINIAN I.)	.25	2.00
Flowers blue; leaves dark green.		
LATHYRUS LATIFOLIUS (EVERLASTING PEA)	.25	
Eu., 6 ft., May, June. A pretty plant to train to trellis or post; flowers in bunches, rose color, showy.		
LATHYRUS OCHROLEUCUS (YELLOW, E. P.)	.25	
W. U. S., 3 ft. Flowers yellow; a slender climber; poor soil.		
LEWISIA REDIVINA (SPATLUM)	.30	
W. U. S., 3 in. Root large, eaten by the Indians; leaves narrow, fleshy; flowers rose colored, large.		

	Each.	Per doz.
LIATRIS (Blazing Star or Gay Feather) Showy tuberous rooted North American plants, with simple stems, narrow leaves and spikes of showy purple flowers. Some of the species should be in every collection; they grow well in any good soil.		
LIATRIS CYLINDRACEA (Cylindrical, B. S.) W. U. S., 1½ ft., Aug. Flower heads large, arranged in pyramidal spike.	.25	
LIATRIS ELEGANS (Elegant Blazing Star) Sept. Leaves narrow and recurved; flowers in a pyramidal spike one foot long.	.25	
LIATRIS PUNCTATA (Dotted, B. S.) So. W. U. S., Sept. Flower spikes reddish purple.	.25	
LIATRIS PYCNOSTACHYS (Kansas Gay Feather) W. U. S., 3 ft., Oct. Spikes very long and dense; leaves narrow, light green.	.25	
LIATRIS SCARIOSA (Blazing Star) E. U. S., 4 ft., Sept. Flower heads large, and spike often 2 ft. long; one of the showiest.	.20	1.50
LIATRIS SPICATA (Spiked, B. S.) W. U. S., 1½ ft., July, Aug. Flowers in close cylindrical spikes, that rise from a cluster of narrow glossy green leaves.	.20	1.50
LILLIUM (Lilies). Every person is acquainted with a few garden lilies that have been in cultivation for years. But few have an idea how many very beautiful species and varieties there are that are not seen so commonly, and many of which can be cultivated just as easily as the white *Lilium Candidum* or the *Japan* lilies. Lilies should be planted in a deep well drained soil. If sandy, work in leaf mould, or well decayed peat and thoroughly composted manure in moderate quantities. Plant from 4 (for very smallest bulbs) to 7 in. deep. The California lilies should be planted from 8 in. to 1 ft., and when planted let alone, for they will increase in perfection if undisturbed. When planting lilies it is well to surround the bulb with a layer of fine coal ashes or sand to prevent decay and the ravages of insects. It is quite necessary that the bulbs be protected from our hot sun, which can be done by planting them among low growing shrubbery as Rhododendrons or Azaleas, or by a heavy mulching. It is well to cover beds with coarse manure in winter, the coarser part should be raked off in the spring, and the finer part left, very carefully forked in. When lilies are once planted in suitable soil, they should not be disturbed for several years; they will increase in luxuriance and number of flowers if allowed to remain undisturbed.		
LILLIUM AURATUM (Gold Banded Lily) Flowers white, with gold band through the center of each petal, and maroon spots at base. Fragrant. Often 10 in. in diameter, and 25 on a stem, 2 to 5 ft.	.50	
LILLIUM BROWNII Flowers trumpet shaped, sweet scented, snow white inside, brown outside.	1.25	
LILLIUM BATEMANIÆ (Bateman's L.) Japan. 3 to 4 ft., Aug. Flowers deep apricot tint, in umbels of 4 to 12.	2.00	

	Each.	Per doz.
LILLIUM BULBIFERUM	.25	
Eu., 1 to 3 ft., June. Flowers orange red, numerous in umbels.		
LILLIUM CALLOSUM	1.75	
Japan, 1 to 3 ft., June. Flowers scarlet, petals reflexed, 2 to 9 in. nodding racemes, 1 to 3 ft.		
LILLIUM CANADENSÆ (Wild Yellow, L.)	.20	
N. U. S., 3 to 5 ft., July. Flowers yellow, with brown spots, petals reflexed, 1 to 15 nodding flowers, 2 to 5 ft.		
LILLIUM CANADENSÆ RUBRUM	.25	
N. U. S., 3 to 5 ft., July. Flowers red, with brown spots, showy.		
LILLIUM CANDIDUM (Easter, E.)	.25	
So. Eu., 3 to 4 ft., June. Flowers pure white, evergreen leaves, 3 to 4 ft.		
LILLIUM CHALCEDONICUM	.75	
So. Eu., 3 to 4 ft. Flowers coral red, petals reflexed, 2 to 12 in a nodding raceme, bright and showy, 3 to 4 ft.		
LILLIUM COLUMBIANUM	.30	
Flowers reddish orange, purple dots, petals reflexed, 2 to 6 flowers.		
LILLIUM CONCOLOR	.30	
China, 1 ft. Flowers scarlet, with black spots, upright, 1 to 12 in number.		
LILLIUM CONCOLOR LUTEUM	1.00	
Flowers yellow.		
LILLIUM CONCOLOR CORIDION	.50	
Flowers yellow, spotted brown.		
LILLIUM CONCOLOR PULCHELLUM	.75	
Flowers crimson, black spots.		
LILLIUM CORIDION	.30	
Flowers star like, yellow, with black dots; desirable.		
LILLIUM CROCEUM	.50	
Eu., 3 to 6 ft., July. Flowers orange, tinged crimson, 10 to 20 in umbel.		
LILLIUM DAHURICUM	.50	
No. Africa, 2 to 3 ft., July. Flowers brilliant red, with small dots, upright, in umbel, 2 to 3 ft.		
LILLIUM EXCELSUM	.50	
4 to 6 ft., July. Flowers buff, tinged red, fragrant, with recurved petals.		
LILLIUM HANSONI	1.50	
Petals waxy, brilliant reddish orange, and very thick.		
LILLIUM HUMBOLTII	.50	
Cal., 8 in. to 5 ft. Flowers orange red, claret dots, 6 to 10 in number.		
LILLIUM KRAMERI	.50	
Flowers clear rose, fragrant, 3 to 4 ft.		
LILLIUM LEICHTLINII	1.00	
Japan, 5 to 6 ft., July. Flowers golden yellow, purple spots, petals recurved, 15 to 20 flowers, 4 to 5 ft.		
LILLIUM LONGIFLORUM	.25	
Japan, 1½ ft. Flowers white, fragrant, 4 to 7 in. long, 1 to 9 in number, 3 to 5 ft.		
LILLIUM LONGIFLORUM EXIMIUM	.30	
Flowers purer white and larger than type.		

	Each.	Per doz.
LILLIUM LONGIFLORUM HARRISII. Has a long season of bloom and comes in earlier than type.	.75	
LILLIUM LONGIFLORUM TAKESIMÆ. Flowers white, purple outside.	.35	
LILLIUM LUCIDUM (new). Flowers yellow, black spots.	.75	
LILLIUM MARTAGON. Eu., 3 to 6 ft., June. Flowers claret, purple dots, petals recurved, 3 to 20 flowers.	.20	
LILLIUM MARTAGON ALBUM. Flowers white.	.50	
LILLIUM MEDEOLOIDES (new). Japan, 1 to 2 ft., June. Flowers orange red, claret dots, 1 to 3 flowers, upright, leaves whorled, 1 to 2 ft.	1.00	
LILLIUM PARDALINUM. Cal., 3 to 5 ft. Flowers orange, yellow center, petals recurved.	.50	
LILLIUM PARRYII (new). Flowers yellow, fragrant, petals recurved.	.75	
LILLIUM PARVUUM. Cal. Flowers orange, with red tips, petals recurved, spotted.		
LILLIUM PHILADELPHICUM. E. U. S, 2 to 3 ft., June. Flowers vermillion, spotted black, upright, 1 to 5 flowers.	.20	.50
LILLIUM POMPONIUM. So. Eu., 2 to 3 ft. Flowers red, dotted black, 2 to 15 flowers in raceme.		
LILLIUM PULCHELLUM. Flowers deep crimson, star like.	.60	
LILLIUM PYRENAICUM. W. Eu., 2 to 4 ft. Flowers yellow, green at base, black spots, 1 to 10 flowers, drooping.	.50	
LILLIUM SPECIOSUM ALBUM. Aug. White, fragrant	.50	
LILLIUM SPECIOSUM ALBUM PRÆCOX. Japan, Aug. Flowers white, tinged rose, finer form than white.	.50	
LILLIUM SPECIOSUM MELPOMENE. Very fine dark colored var.	1 00	
LILLIUM SPECIOSUM ROSEUM. Japan, 1 to 3 ft., Aug. Flowers rose, petals reflexed, fragrant.	.25	
LILLIUM SPECIOSUM RUBRUM (true). Japan, 2 to 3 ft., Aug. Flowers dark red, fragrant.	.75	
LILLIUM SUPERBUM. E. U. S., 16 ft., July. Flowers orange red, spotted claret, petals recurved, 10 to 40 flowers, very fine, 4 to 6 ft.	.20	
LILLIUM SZOVITZIANUM. Flowers waxy yellow, black spots, petals recurved.	1.00	
LILLIUM TENUIFOLIUM. No. Eu., 1 to 2 ft., May. Flowers brilliant scarlet, petals reflexed, leaves narrow, 3 to 5 ft.	.50	
LILLIUM THUMBERGIANUM BICOLOR. Flowers mottled with scarlet and orange, black spots, 1 to 2 ft.	.25	
LILLIUM THUMBERGIANUM CITRINUM. Flowers clear yellow.	.20	

	Each.	Per doz.
LILLIUM THUMBERGIANUM INCOMPARABLE	.15	
Flowers dark red, base yellow, fine dots, 5 to 20 flowers, 4 to 6 in. in diameter, 2 to 3 ft.		
LILLIUM THUMBERGIANUM FULGENS FLORE PLENO (DOUBLE, L.)	.25	
Flowers deep maroon and white, double.		
LILLIUM THUMBERGIANUM GRANDIFLORUM	.25	
Flowers orange red.		
LILLIUM THUMBERGIANUM GRANDIFLORUM MULTIFLORUM	.25	
LILLIUM THUMBERGIANUM PICTUM	.20	
Very deep maroon.		
LILLIUM THUMBERGIANUM ROBUSTUM	.15	
Very strong growing.		
LILLIUM TIGRINUM (TIGER LILY)	.30	
Flowers orange red, black spots, petals recurved, 4 to 5 ft.		
LILLIUM TIGRINUM FLORE PLENO (DOUBLE TIGER L.)	.25	
Flowers full double.		
LILLIUM TIGRINUM SPLENDENS	.25	
Flowers orange scarlet, and more numerous than type, 4 to 6 ft.		
LILLIUM UMBELLATUM	.50	
Flowers bright red, black dots, very showy.		
LILLIUM WASHINGTONIANUM	.50	
Cal. White, turning lilac.		
LILLIUM WALLACEI	.40	
Japan. Flowers buff, spotted black.		
LOBELIA CARDINALIS (CARDINAL FLOWER)	.20	2 00
U. S., 1 to 3 ft., Aug. A very brilliantly colored native flower that does well in the open border. Flowers are in spikes 8 in. to 1 ft. long, and are of an intense scarlet; this flower should be in every collection, however small.		
LOBELIA SYPHILITICA (GREAT BLUE LOBELIA)	.25	
Flowers in a spike, clear blue, will grow in open border in rather moist spot.		
LYCHNIS CHALCEDONICA (PRIDE OF LONDON)	.25	2.50
No. Eu., 2 to 3 ft., June, July. An old fashioned plant of much merit, the flowers are a brilliant scarlet, the habit of the plant is neat, and it does well in the open border in good soil, very desirable.		
LYCHNIS CHALCEDONICA FLORE PLENO	.50	
A double flowered variety of the above, of a darker shade of color, rare.		
LYCHNIS CHALCEDONICA VAR. ALBA	.25	
A white variety of the above.		
LYCHNIS FLOS CUCULI (RAGGED ROBIN)	.20	2.00
Eu., 1 ft., June. Flowers full double, dark red, 1 in. in diameter, in clusters, foilage makes a neat tuft about 6 in. high, very desirable.		
LYSIMACHIA CLETHROIDES	.25	
Japan, 1½ ft., Aug., Sept. Leafy stems, terminated with graceful drooping racemes of pure white flowers.		
LYSIMACHIA QUADRIFOLIA (FOUR LEAVED LOOSE-STRIFE)	.15	1.00
E. U. S., 1½ to 2 ft., June. Foliage prettily tinged with red as it comes out in spring, flowers from the axils of the leaves, yellow with dark spots; good to naturalize in wild garden.		

	Each.	Per doz.
LYSIMACHIA STRICTA	.15	1.00
Flowers yellow, with dark spots, in a raceme at end of leafy stem; wild garden.		
LYSIMACHIA THYRSIFLORA	.20	1.50
Flowers yellow, in round heads, ¾ in. in diameter from axils of leaves: wild garden.		
LYSIMACHIA NUMMULARIA (Money Wort)	.20	2.00
Eu., June, Aug. Flowers yellow in axils of leaves, stem creeping covering ground; useful in shady places; leaves bright, glossy green.		
LYSIMACHIA NUMMULARIA var. AUREA	.25	
A golden-leaved variety of above.		
LYTHRUM SALICARIA var. SUPERBUM (Swamp Loose-strife)	.25	2.50
2 to 4 ft., July, Aug. A plant with long dense spikes of rose colored flowers, will do well in swamps or open border.		
MARSILEA QUADRIFOLIA	.30	2.50
A rare aquatic, interesting to botanists; it has no true flowers, but the leaves are in the shape of a maltese cross, and look pretty floating on the surface of the water.		
MEDEOLA VIRGINICA (Indian Cucumber Root)	.20	2 00
E. U. S., 2 ft. Leaves in a whorl, flowers greenish white, fruit blue. The fruit with the upper whorl of leaves, which is colored, is interesting and pretty.		
MELISSA OFFICINALIS VARIEGATA (Variegated Balm)	.25	
Eu., 1½ ft Leaves are prettily edged with white, making it nice as a foliage plant.		
MENYANTHES TRIFOLIA (Bog Bean)	.20	2.00
E. U. S., 1 ft, June. A very pretty bog plant, with spikes of delicately fringed pure white flowers, and a trifoliate leaf.		
MERTENSIA OBLONGIFOLIA (Oblong Leaved Lungwort)	.25	
Or., 6 in., April Flowers blue, numerous, very pretty; rock work		
MERTENSIA PANICULATA (Panicled Lungwort)	.30	
Or., 2 ft., July. Flowers dark blue, large; rich loam.		
MERTENSIA VIRGINICA (Virginia Lungwort)	.30	
U. S., 1 to 2 ft., May, June Leaves glaucous green, flowers a delicate shade of blue, in drooping racemes; plant in rich border and do not disturb; very desirable.		
MICROMERIA DOUGLASII (Yerba Buena)	.25	
A neat trailer, with pretty foilage and purplish flowers; plant in moist shady spot, or under trees.		
MIRABILIS MULTIFLORA	.30	
W. U. S., 1 ft, Aug, Sept. A plant with spreading stems, glaucous leaves and large purple flowers, several appearing from a single involucre.		
MITCHELLA REPENS (Patridge Berry)	.15	1.00
N. U. S. Plant trailing, with dark green leaves, light pink flowers, and bright scarlet berries that hold on all winter; shady spot in leaf mould.		
MONARDA DIDYMA (Oswego Tea)	.20	1.50
E U S, July, Sept. Flowers and plant strongly and pleasantly fragrant, flowers handsome scarlet in heads.		
MONARDA FISTULOSA	.20	1.50
Similar to last, with purple flowers.		

	Each.	Per doz.
MONARDELLA ODORATISSIMA	.25	
Or Flower bracts pink, plant very fragrant.		
MUSCARI BOTRYOIDES (Grape Hyacinth)	.10	.75
Eu., 6 to 8 in. Flowers dark blue, in dense raceme, with delicate fragrance; best moved in fall.		
MYOSOTIS ALPESTRIS (Forget-me-not)	.20	
Eu., 4 in. Flowers a very pretty shade of blue, with small yellow eye, blooms profusely; moist, slightly shaded spot.		
MYOSOTIS ALPESTRIS var. ROSEA	.25	
A rose colored variety of last.		
NUPHAR ADVENA (Cow Lily)	.25	2.00
E. U. S., June, Aug. Leaves large, light green; flowers roundish, ½ in. in diameter, yellow, not very handsome, but interesting as an aquatic.		
NYMPHÆA ODORATA (White Water Lily)	.25	2.00
A beautiful and well known native hardy aquatic, with pure white double and very fragrant flowers. It can be planted at the bottom of a pond or stream by tying a stone to the roots and sinking them. It may also be planted in a tub, where it will do well and blossom; put in a layer of muck or leaf mould, plant root in this, then cover slightly with gravel, then fill with water and place out of doors; put in cellar in winter, and keep soil moist but not very wet.		
NYMPHÆA FLAVA	.50	
A very rare southern pond lily, with pale yellow handsome flowers.		
ŒNOTHERA MISSOURIENSIS (Mo. Evening Primrose)	.30	
S W. U. S. Prostrate. Flowers large yellow, opening towards evening.		
OMPHALODES VERNA (Creeping Forget-me-not)	.25	2.50
So. Eu., May. Foliage bright green; flowers dark blue with white eye; very pretty.		
ORCHIS SPECTABILIS (Showy Orchis)	.30	
E. U S., 6 in., June Leaves wide, glossy green; flowers handsome, pink purple with white lip.		
ORNITHOGALUM UMBELLATUM (Star of Bethlehem)	.20	1.50
Eu., 6 in., May, June. Flowers white in umbels, open in the middle of the day.		
OPUNTIA MISSOURIENSIS	.20	2.00
W U. S. A hardy cactus, with flattened dark green stems covered with long prickles, flowers yellow; dry soil.		
OPUNTIA RAFINESQUII (Western Prickly Pear)	.20	2.00
W. U. S. Stems very spiny; flowers yellow, with reddish center		
OPUNTIA VULGARIS (Common Prickly Pear)	.20	2.00
N. U. S Stems covered with very short prickles; flowers large, light yellow.		
OXALIS VIOLACEA (Violet Wood Sorrel)	.20	2.00
So. U. S., 8 in. Flowers violet, on long stem, from scaly bulb, border; rich soil.		
PACHYSANDRA PROCUMBENS (Mountain Spurge)	.25	2.50
Alleghanies, 8 in., Apr. Flowers white, peculiar; leaves nearly evergreen; rare.		
PÆONIA BROWNII (Brown's Pæony)	.35	3.50

	Each.	Per doz.
Cal., Or. Rare; leaves thick, pinnate; flowers a very rich dark red shade.		
PÆONIA. A class of plants that has been greatly improved in form and color. They do well in any good garden soil, the richer the better. A fine feature in the wild garden would be a clump of these showy flowers.		
NAMED VARIETIES.	.50	5.00
ALBICANS PLENA. Rosy pink, changing to white or blush		
AMBROSE VERSCHAFFELT. Purplish crimson		
BICOLOR. Dark rose, yellow center, marked red		
CENTRIPETALA. 1st row petals, deep pink; 2d row, fringed; 3d row, broad and full		
CLAPTONIA. Creamy white center, outside tinged pink		
DELACHII. Dark purplish crimson		
FESTIVA. White, with marks of carmine in center		
GRANDIFLORA CARNEA PLENA. Light yellow, outside blush		
HUMEI. Purplish rose, very full and double		
L'ORRIFLAMME. Cherry red		
LOUIS VAN HOUTE Dark crimson, very compact		
MAXIMA PLENA. Very large, double crimson		
MRS. DAGGE. White, center marked red		
PAPAVERIFLORA. Yellowish white, center marked red		
POTSII. Dark blueish crimson		
SULPHUREA ALBA. Creamy white, fragrant		
PÆONIA MOUTAN (TREE PÆONY)	1.00	
Eu., 2 to 5 ft. Have several varieties of this PÆONY, including dark and light shades.		
PÆONIA TENUIFOLIA	.75	
A species with fine cut foliage and single crimson flowers with yellow stamens. Not so fine cut foliage as next.		

Pæonia Tenuifolia Double.

PÆONIA TENUIFOLIA FLORE PLENO (DOUBLE FINE LEAVED PÆONY)	.75	
Eu., 1 to 2 ft. Leaves cut into very fine thread like division, giving the plant a very graceful appearance. Flowers the color of a Jacqueminot rose, and full double; a very desirable plant.		

	Each.	Per doz.
PANICUM VIRGATUM (Tall Panic Grass) E. U. S., 5 ft. A very graceful and ornamental grass, with fine and delicate plumes.	.15	
PANICUM AMARUM (Panic Grass) E. U. S., 1½ ft. Glaucous, spike upright.	.20	
PAPAVER ALPINUM (Alpine Poppy) Eu., 1 ft. Flowers white, foliage glaucous; rockwork or well drained light soil.		
PAPAVER CROCEUM Eu., 1 ft. Flowers yellow, leaves glaucous; delicate plant; well drained light soil or rockwork,	.25	
PAPAVER ORIENTALE (Oriental Poppy) Caucasus, 2½ ft., June. Flowers 4 to 6 in. in diameter, of a very brilliant orange scarlet, with dark purple spots at base of petals and purple stamens; foliage handsome. A very showy and desirable perennial; good garden soil.	.25	2.50
PARDANTHUS CHINENSIS (Blackberry Lily) China, 3 to 4 ft. Flowers numerous, orange, spotted crimson; fruit like large ripe blackberry; leaves like Iris; desirable.	.20	1.50
PARNASSIA CAROLINIANA (Grass of Parnassus) E. U. S., 1 ft., Sept. Leaves round, light green; flowers white, veined with light green; flower stem has round leaf in center. An interesting and pretty plant, for moist shady spots or borders of ponds.	.20	2.00
PARNASSIA FIMBRIATA (Fringed, G. of P.) Or., 1 ft., Sept. Flowers beautifully fringed.	.50	
PASSIFLORA LUTEA (Hardy Passion Flower) W. U. S. A climber, with lobed dark green leaves and yellow flowers.	.25	2.00
PASSIFLORA INCARNATA (Passion Flower) S. U. S. A climber, with cut leaves and purple and white flowers.	.20	2.00
PEDICULARIS CANADENSIS (Wood Betony) E. U. S., 10 in. Leaves divided and handsome; flowers yellow or pinkish.	.25	
PELTANDRA VIRGINICA E. U. S., 2½ ft. A bog plant with leaves similar to Calla Lily, dark green; flowers in a narrow green spathe, fruit nodding; makes a handsome clump in wet spots.	.25	
PENSTEMON BARBATUS var. TORREYI (Torrey's Penstemon) S. W. U. S., 4 ft. Flowers bright crimson, in a long raceme.	.25	
PENSTEMON CONFERTUS Flowers purple, in close racemes; very pretty.	.25	
PENSTEMON COBŒA (Cobœa Flowered P.) S. W. U. S., 2 ft. Flowers like fox' glove, purple; one of the finest penstemons	.35	
PENSTEMON GRANDIFLORUS W. U. S., 1½ ft. Flowers purple; leaves glaucous green.	.25	
PETALOSTEMON CANDIDUS E. U. S., 2 ft. An upright growing wooly plant, with white flowers in spike.	.25	
PETALOSTEMON VIOLACEUS Similar to last, with smooth leaves and violet flowers.	.25	

PHLOX.

The general impression received of these flowers is that given by the old fashioned purple and white; but they have been so improved by cultivation that they are among the most showy of all perennials, and include shades and variegations of pure white, cream, carmine, salmon, rose, lilac, purple, violet, and crimson. A proper selection and treatment will furnish a brilliant display of flowers from June until Oct. They grow in any good garden soil, and should be divided about every three years, and replanted in the fall. If the flowers are plucked when they commence to fade, flowering side shoots will be thrown up that will lengthen the season of flowering.

NAMED VARIETIES.

	Each.	Per doz.
Amabilis. Rosy salmon, deep carmine eye, very fine trusses	.20	1.50
Arago. Light rose, margined white, deep carmine center, very large panicle	.35	3.00
Augusta Riviere. Bright salmon red, large flowers, dark center	.30	2.50
Beldonville. White, crimson center; very large flower	.30	2.50
Belle Pyramide. Rose, purple center; compact pyramid	.25	2.00
Bijou. Dwarf, pure white	.25	2.00
Boule de Feu. Fiery red, crimson eye; very fine	.25	2.00
Chaney. Rosy purple, crimson eye	.20	1.50
Charlemagne. Dark violet purple	.25	2.00
Chimere. Violet purple, dwarf	.25	2.00
Citoyen de Capreva. White shaded violet, violet crimson center	.25	2.00
Coccinea. Fiery red, dark center	.20	1.50
Croix d'Honneur. Striped rose, manue and white; showy	.20	1.50
Czarina. Pure white, very dwarf and compact	.25	2.00
Didon. Rose, center carmine, sometimes striped white	.20	1.50
D. Paran. Purplish rose, flushed crimson in center, dwarf	.25	2.00
Dr Gilkinet. Deepest red, vermillion center, large spikes	.35	3.00
Figaro. Clear rose, deep carmine center	.25	2.00
Gierville. White; striped brightest crimson; extra fine	.35	3.00
Heloise. Rose, margined white, with center and stripes of crimson	.25	2.00
Ixion. Lively scarlet; fine	.25	2.00
Jean d'Arc. Dwarf, panicles large, pure white	.25	2.00
La Cœur du Monde. Lilac rose, flowers large and imbricated	.30	2.50
La Fille du Rolland. White tinged salmon, purple carmine center, flower very large	.30	2.50
Le Patriote. White, rose carmine center, flower perfect, very fine truss	.35	3.00
Le Pole Nord. Very luxuriant grower; flowers white, purple center; very large truss; very fine	.25	2.00
M. Vailliant. Deep crimson, striped white	.20	1.50
Md. Chas. Klen. Very light violet, large dark crimson center, flower very large	.35	3.00
Md. Frument. Dark violet purple	.25	2.00
Md. Leonard Lille. Flesh, spotted and striped rose	.25	2.00
Md. Louise Gaulin. Pure white; very fine	.20	1.50
Md. Moreau. Deep rosy violet, carmine center, bordered white; very fine flower	.35	3.00
Md. Moisette. Mauve rose, dark rose center	.25	2.00
Md. Nelson. White, shaded and striped violet, crimson center	.20	1.50

	Each.	Per doz.
Md. P. Langier. Light rosy salmon, dark crimson center; very large flower	.30	2.50
Md. Trotter. White purplish, red center	.25	2.00
Md. Verlot. Rosy mauve, pink eye petals, imbricated	.20	1 50
Menotti. Rosy pink, white center	.20	1.50
Michael Buckner Very dark violet purple	.30	2.50
Miss Robertson. Large, pure white; fine	.20	1.50
M. Delaunay. Striped salmon, purple center	.20	1.50
M. Guldenschuck. Rosy salmon	.20	1.50
M. Van Houtte. White, purplish red center	.25	2.00
Parrau. Rosy purple center, flaked carmine	.25	2.00
P. Langlier. Rich puplish crimson, carmine center; very large flower.	.30	2.50
Premier Minister. Rosy white, with very large pure rose center; distinct; new	.35	3.00
Princess Louise. White shaded crimson, carmine eye	.25	2.00
Richard Larois. Rose, very large and perfect flower	.25	2 00
Sauson Rival. Pure white, with distinct purplish crimson center	.20	1.50
Souvenir de Berryer. Scarlet, large purple center	.25	2.00
Thiers. Pure white, deep violet center; enormous flower	.20	1.50
Velleda. Pure white, crimson eye	.20	1.50
Victor Tissot. Flower rose, white center; flower and panicle very large		
Vulcan. Bright red, self color	.20	1.50
White Lady. Pure white, dwarf	.25	2.00
White Queen. Pure white	.20	1.50
PHYSOSTEGIA VIRGINIANA (Dragon Head)	.25	
S. U. S., 3 to 4 ft., all summer. Flowers purplish red, in numerous spikes.		
PLATYCODON GRANDIFLORUS (Large Bell Flower)	.25	2.50
Siberia, 2 ft., June, Aug. Flowers bell shaped, deep blue, 2 to 2½ in. in diameter, buds balloon shaped; very desirable (sometimes called *Walembergia* or *Campanula gr'fl.*)		
PLATYCODON GRANDIFLORUS var. ALBA	.25	2.50
A variety of last, with white flowers, veined purple; very fine.		
PODOPHYLLUM PELTATUM (Mandrake or May Apple)	.20	2.00
U. S., 1½ ft., May. Leaves large and handsome; flowers white, 2 in. in diameter; nodding fruit, red, edible; rich soil.		
POLEMONIUM REPTANS (Greek Valerian)	.20	2.00
W. U. S., 8 in., May. Flowers blue or white; foliage pinnate; desirable.		
POLYGALA POLYGAMA (Ground Flowering Milkwort)	.25	2.00
E. U. S., 6 to 9 in. Flowers rose purple, fringed; in numerous dense and showy racemes; it also has flowers on stems under ground; interesting and pretty.		
POTENTILLA ANSERINA (Salt Marsh Potentilla)	.25	
E. U. S., 1 ft. Flowers ¾ in. in diameter, yellow; leaves pinnate, with white under surface.		
POTENTILLA GRASCILIS	.25	
Or., 3 ft. Leaves hairy and finely cut; flowers yellow, ¾ in. in diameter.		
POTENTILLA PALUSTRIS	.25	
Or. Leaves pinnate; flowers large, purple.		
POTENTILLA DOMBEYII (Dombey's P.)	.20	2.00
W. U. S., 1 ft. Flowers white; leaves light green, pinnate.		

	Each.	Per doz.
PRIMULA VULGARIS (English Primrose) Flowers maroon and orange; plant in cool, deep, and rich soil.	.25	2 50
PROSARTES MENZIESII. Or., 3 ft. Stem branching; flowers white, nodding; berry salmon colored.	.35	
PROSARTES OREGONA Or. Plant; wooly leaves heart shaped; flowers purple; fruit ½ in. long.	.35	
PYRETHRUMS. A very beautiful class of perfectly hardy plants, with flowers as double and similar to the German asters; have shades of red, yellow, crimson and white. They should be in every collection; and in the shades they represent will well take the place of the German Asters.	.30	2.50
PYROLA CHLORANTHA (Shin Leaf) 6 in., May. Dark green leaves, and spikes of white flowers; plant in rich, shady soil.	.15	1.00
PYROLA ELIPTICA E. U. S., 6 in., June. Leaves oval, light green; flower similar to last.	.20	1.50
PYROLA ROTUNDIFOLIA E. U. S., June. Leaves large, dark green; flowers white.	.20	1.50
PYROLA SECUNDA E. U. S., July. Flowers in drooping racemes; leaves light green.	.25	2.00
RANUNCULUS ACRIS Flore Pleno (Double Buttercup) 3 ft., June, July. Flowers full double, glossy, bright yellow.	.20	1.50
RANUNCULUS HOOKERI (Hooker's B.) Or. Flowers bright yellow, large.	.25	
RHEXIA VIRGINICA (Deer Grass or Meadow Beauty) E. U. S., 1 ft, Aug. Sept. Flowers large rose purple, with large curved yellow anthers A very pretty plant and flower; rich moist soil.	.15	1.50
RUDBECKIA (Cone Flower). A showy genus of No. American autumn blooming compositæ. Flowers of all are different shades of yellow with greenish or dark purple centers. The tall growing varieties are useful as a background to a border.		
RUDBECKIA HIRTA Common in some sections, but pretty enough to cultivate.	.15	1.00
RUDBECKIA MAXIMA 6 ft. Leaf very large and glaucous; flowers very large.	.20	2.00
RUDBECKIA NIDIDA 5 ft. Foliage divided; flowers large.	.20	2.00
RUDBECKIA SPECIOSA 2 ft. Similar to first but a stronger grower.	.20	
RUDBECKIA SCABRA Foliis Variegata 4 ft. Foliage variegated with yellow.	.20	2.00
SABBATIA CHLOROIDES (Am. Centaury) E. N. S., 1½ ft. Flowers deep rose color and purple; plant propagates itself by offsets, giving it the durability of a perennial; very showy; moist sandy soil.	.25	
SABBATIA STELLARIS (Starry Centaury) Similar to last, with smaller and more delicate parts; same soil as last.	.25	

	Each.	Per doz.
SAGITTARIA VARIABILIS	.20	2.00
Foliage handsome; flowers pure white, several on a single stem; very pretty to naturalize in wet spots on edge of streams, etc.		
SALVIA PATENS	.25	
1 ft. Flowers in a raceme, light blue: leaves oval.		
SANGUINARIA CANADENSIS (Blood Root)	.20	2.00
E. U. S., 6 in., May. A very pretty early flowering native; the flowers are pure white and very showy, in a clump, in early spring; the leaves are also handsome.		
SAXIFRAGA CRASSIFOLIA (Thick Leaved Saxifragi)	.25	
Siberia, 12 in., May. Leaves are large, thick and evergreen, the flowers are bell shaped, pink, and very numerous on end of fleshy stem.		
SAXIFRAGA VIRGINIENSIS (Early S.)	.20	2.00
E. U. S., 6 in., Apr., May. Leaves evergreen, in low rosette; flowers white, in dense cluster.		
SCILLA SIBERICA	.20	2.00
An early spring flowering bulb, with a spike of the loveliest dark blue flowers.		
SCUTELLARIA ANTIRRHINOIDES (Snap Dragon Skull Cap)	.30	
Or., 12 in. Roots tuberous; flowers dark purple; sandy soil.		
SEDUM (Stone Crop).		
Plants that have a great variety of form in foliage; the flowers are shades of yellow, white, rose color and purple. They do well in poor soil on a rocky spot, and are very tenacious of life. Water should not be allowed to settle about them.		
SEDUM ACRE (Common Stone Crop)	.15	1.00
Form low moss like clumps, with yellow flowers.		
SEDUM DOUGLASII	.20	
Or. Low tufted; flowers yellow.		
SEDUM MAXIMOWICZII	.25	
Japan, 10 in. Flowers in large flat clusters, bright yellow, fine.		
SEDUM OREGANUM (Oregon, S.)	.25	
Dwarf; flowers rose colored.		
SEDUM PULCHELLUM (Beautiful, S.)	.25	
S. U. S. Flowers purple, branching in form of cross, handsome; leaves narrow.		
SEDUM SIEBOLDII (Siebold, S.)	.20	
Japan, 8 in., Sept. Flowers rose purple; leaves round, in threes.		
SEDUM SIEBOLDII VARIEGATUM	.30	
A variety of last, with white variegated leaves.		
SEDUM SPECTABILE (Showy, S.)	.20	1.50
Japan, 12 in., Sept. Oct. Flowers in very large flat clusters, rose purple, handsome and showy; leaves glaucous; very desirable.		
SEDUM STENOPETALUM	.25	
Or., 6 in. Flowers bright yellow; leaves narrow.		
SELAGINELLA APUS (Creeping Club Moss)	.20	2.00
Very pretty for covering moist ground.		
SEMPERVIVUMS (Houseleeks)	.25	2.00
Related to the Sedums, and also very tenacious of life. Their rosettes of leaves are quite varied and very pretty and interesting. The flowers are also pretty in many species; they will grow on the moist barren spots, and are very useful in rockwork, forming		

	Each.	Per doz.
borders, or mosaic beds. We can furnish 60 species and varieties, 50 of which are named. Our collection is not excelled by any in this country.		
SENECIO AUREA (Golden Rag Weed)	.20	1.50
E. U. S. A pretty native plant, with handsome foliage and pretty yellow flowers.		
SIDALCEA HUMILIS	.25	
Or., 2 ft Flowers purple; leaves parted.		
SILENE HOOKERII (Hooker's Catch Fly)	.25	
Or., 10 in. Leaves glaucous; flowers pale pink, 2½ in. in diameter.		
SILENE LYALII (Lyal's S.)	.25	
Stems slender; leaves long; flowers brownish purple, 1 in. in diameter.		
SILENE OREGONA	.25	
Or. Petals finely cut.		
SILENE SCOULERII	.25	
Or. Stout perennial; flowers handsome.		
SILENE VERECUNDA	.25	
Or. 10 in. Stems simple, pubescent; flowers rose colored, ¾ in. long.		
SILPHIUM INTEGRIFOLIUM	.25	2.50
W. U. S., 5 ft Stem simple; leaves oval, and alternate along length of stem; flowers large, yellow.		
SILPHIUM LASCINIATA	.25	2.50
W. U. S., 6 ft. Leaves clustered at base, large, and cut into narrow divisions; stem tall, with large light yellow flowers.		
SILPHIUM PERFOLIATUM (Cup Plant)	.25	2.50
W. U. S, 6 ft., Sept. The large leaves form a cup shaped cavity around the stem; flowers large, yellow.		
SOLIDAGO (Golden Rods).		
A very showy class of plants with yellow flowers, and as a general rule very graceful habit; they are desirable in the wild garden, or to mix among shrubbery to brighten it up during the fall. A clump of the golden rods is very pretty. They flower from Aug. to Oct.		
SOLIDAGO ALTISSIMA	15	1.00
Tall, with rough leaves.		
SOLIDAGO ARGUTA	.15	1.00
4 ft Large dark green leaves at base.		
SOLIDAGO BICOLOR	.15	1.00
The only one not yellow; this is white.		
SOLIDAGO CÆSIA	.15	1.00
3 ft. Purple stems, slender, drooping habit.		
SOLIDAGO CANADENSIS	.15	1.00
4 ft Very bright yellow.		
SOLIDAGO DRUMMONDII (Drummond, S.)	.25	
S. W. U. S. Plant forms a graceful clump of drooping leafy stems, with bright yellow flowers in upper axils.		
SOLIDAGO NEMORALIS	.15	1.00
2 ft. Leaves glaucous, low growing.		
SOLIDAGO PUBERULA	.20	1.50
2½ ft. Compact heads of flowers, very bright yellow; one of the best.		

	Each.	Per doz.
SOLIDAGO RIGIDA. 5 ft. Very large leaves, and large flower heads; one of the showiest.	.20	1.50
SOLIDAGO SHORTII. 5 ft. One of the showiest and most graceful species.	.25	2.00
SOLIDAGO STRICTA. 3 ft. Leaves dark green, smooth, forms a neat clump; one of the best.	.20	1.50
SOLIDAGO VIRGA-AUREA VAR. ALPINA. 1 ft. An alpine species, dwarf.	.30	2.50
SMILACINA BIFOLIA. E. U. S., 2 to 4 in., May. A very pretty and delicate little white flower for rich shady spots.	.15	1.00
SMILACINA RACEMOSA. E. U. S, 2 ft. A large terminal cluster of cream colored flowers and dark red berries, that are showy for a long time in the fall.	.20	1.50
SMILACINA STELLATA (FALSE SOLOMON'S SEAL). E. U. S., 8 to 12 in. Leaves light green; flowers white, in terminal clusters; moist soil.	.25	
SMILACINA TRIFOLIA. 6 in., June. Flowers white, in terminal raceme; berries red, and leaves dark green.	.25	2.00
SPIRANTHES CERNUNA. E. U. S. An orchid, with pretty, fragrant white flowers in a spiral; moist rich soil.	.20	2.00
SPIRÆA ARUNCUS (GOAT'S BEARD). W. U. S., 3 to 5 ft Flowers cream colored, very fine, in a large showy panicle; foliage handsome; a clump looks very handsome when in flower.	.25	2.00
SPIRÆA FILLIPENDULA (DROPWORT). Eu., 2 ft., June. Flowers white, tinged pink, numerous; leaves are very finely cut and handsome, forming a rosette of dark green close to ground	.25	2.50
SPIRÆA LOBATA (QUEEN OF THE MEADOW). U. S., 4 ft., June Flower a very fine shade of pink in handsome irregular cluster, foliage lobed, handsome; one of the best perennials.	.25	2.00
SPIRÆA ULMARIA (ENG. MEADOW SWEET). Eu., 2½ ft. Flowers white; foliage dark green, desirable.	.25	2.00
SPIRÆA ULMARIA FOL VAR (VARIEGATED M. S.). Foliage banded through the center of each leaflet with bright yellow; flowers white. One of the best variegated plants.	.30	2.50
STATICE LIMOSUM VAR. CAROLINIANA (SEA THRIFT). 1½ ft., Sept. Flowers violet, numerous fine branches; they dry nicely for winter decoration, and are sold on the streets of Boston for that purpose; leaves dark glossy green.	.25	2.00
STENANTHIUM OCCIDENTALE. Or., 3 ft. Bulbous flowers in a simple raceme, yellowish purple, ¾ in. long; moist shady soil.	.25	
STOKESIA CYANEA (BLUE STOKESIA). S. U. S., Aug. until frost. Flowers sky blue, 3 to 4 in. in diameter, similar to China Aster; very handsome and rare; place in well drained soil where no water will stand.	.30	2.50

	Each.	Per doz.
STREPTOPUS AMPLEXIFOLIUS (Twisted Stalk) E. U. S., 3 ft Flowers greenish; fruit large crimson; moist or wet soil.	.20	2.00
SYNTHUS RENIFORMIS Or., 6 in. Flowers blue, on short stems; leaves roundish; damp shady spot.	.25	
SYNTHUS ROTUNDIFOLIA Or., 6 in. Stems slender, racemes few flowered; flowers larger than last; same position	.25	1.00
TANACETUM BALSANIUTE (Costmary) Eu., 3 ft. Leaves very pleasantly fragrant; flowers yellow.	.15	1.00
TANACETUM NIVEUM (White Tansy) Leaves finely divided; flowers 1½ in. in diameter, white, with yellow centers, in flat clusters, lasting for a long time in bloom; quite desirable	.35	
TANACETUM VULGARE (Common Tansy) Eu., 3 ft Leaves finely cut: flowers yellow; plant fragrant. A common plant, but desirable in the wild garden.	.15	
TANACETUM VULGARE var. CRISPUM (Double Tansy) A variety of last, with very rich and handsome dark green crimped foliage, similar to the Australian Fern, Todea; when first growth has been made cut back to ground, and a handsome second growth will appear.	.25	2.00
TEPHROSIA VIRGINICA Stem slender, upright; flowers in close heads at top, white and purple	.20	
THALICTRUM ANEMONOIDES (Rue Anemone) U. S., 6 in. Flowers pure white, ¼ in. in diameter, on slender stems in cluster above a crown of pretty leaves; a very delicate native, much improved by cultivation	.20	2.00
THALICTRUM CORNUTI (Meadow Rue) E. U. S, 5 ft Flower head large, made up of very fine flowers: handsome for wet places to naturalize, or among tall shrubbery.	.15	1.00
THALICTRUM DIOICUM (Upland, M. R.) E. U. S., 2 ft. Foliage handsome; flowers not handsome; should be pinched out as they appear; desirable as a foliage plant	.15	1.50
THALICTRUM OCCIDENTALE Or, 3 ft. Flowers in loose clusters.	.25	
THALICTRUM POLYCARPUM Or., 2 to 3 ft. Flower clusters narrow; foliage handsome.	.25	
TIARELLA UNIFOLIATA Or., 6 in. to 1 ft. Leaves triangular lobed; flowers in loose racemes.	.30	
TIPULARIA DISCOLOR (Crane Fly Orchid) A rare, small flowered orchid.	.30	
TRAUTVETTERIA GRANDIS (False Bugbane) Or., 3 ft. Leaves few, lobed; flowers white, in panicles.	.25	
TRICYRTIS HIRTA Japan, 2 ft., Sept. Oct. Flowers white, with chocolate spots, lily shaped, 1 in. in diameter, leaves lily like; very desirable.	.25	2.50
TRADESCANTIA VIRGINICA (Spiderwort) S. U. S., all summer. Leaves narrow, grass like; flowers violet blue, opening in the morning; grows in any soil; will do finely for wild garden.	.15	1.00

	Each.	Per doz.
TRADESCANTIA VIRGINICA VAR. ALBA.	.25	
White variety of above.		
TRADESCANTIA VIRGINICA VAR. ROSEA.	.25	
A rose colored variety of above.		
TRIENTALIS AMERICANA (STAR FLOWER).	.15	1.50
E. U. S., June. Leaves crown a slender stem; flowers star shaped, pure white from center of leaves; a delicate and pretty plant for shady situation.		
TRIFOLIUM ERIOCEPHALUM.	.25	
Or., 6 in. Flowers large, in ovate hairy heads.		
TRIFOLIUM LONGIPES.	.25	
Or., 6 in. Flowers spiked, purplish.		
TRIFOLIUM MEGACEPHALUM.	.25	
Or. Flowers purplish, 1 in. long, in a spike.		
TRIFOLIUM PLUMOSUM.	.25	
Or., 1 ft. Flowers white, in dense oblong very hairy spikes.		
TRILLIUM CERUNUM.	.25	
Flowers white, nodding.		
TRILLIUM ERECTUM.	.25	
U. S., 1 ft., May. Flowers dark purple, large; plant all trilliums in a rich cool soil in partially shaded spot.		
TRILLIUM ERECTUM VAR DECLINATUM.	.30	
1 ft., May. A variety with a long petiole which is deflexed.		
TRILLIUM ERECTUM VAR ALBUM.	.30	
A variety with yellowish white flowers.		
TRILLIUM ERYTHROCARPUM (PAINTED TRILLIUM).	.25	2.00
E. U. S. Flowers white, with purple and rose veins at base; fruit crimson.		
TRILLIUM GRANDIFLORUM (LARGE FLOWERED T.).	.25	2.50
Flowers large, pure white, turning to deep rose color; very fine		
TRILLIUM OVATUM.	.30	
Or. Similar to *Trillium Grandiflorum*, with larger flowers		
TRILLIUM RECURVATUM (RECURVED T.).	.25	2.00
W. U. S., 6 in. Leaves beautifully mottled; flowers very dark maroon.		
TRITOMA UVARIA (RED HOT POKER).	.20	1.50
So. Africa, 2½ ft., Aug. to Oct. This is not quite hardy, and should be put in the cellar in the winter; the leaves are linear; flowers in a dense spike on the end of a fleshy stem; they are shaded from crimson at top of spike through orange to yellow; are very showy and desirable.		
TRITOMA UVARIA VAR GRANDIFLORA.	.30	3.00
A larger flowered and stronger growing variety of last.		
UVULARIA GRANDIFLORA (LARGE FLOWERED BELLWORT).	.15	1.50
U. S., 1½ ft., May, June. Stem runs through one end of the leaf (perfoliate); flowers 1½ in. long, drooping from under leaves; very pretty.		
UVULARIA PERFOLIATA (PERFOLIATE LEAVED B.).	.20	2.00
1 ft., May. Similar to above, with smaller flowers.		
UVULARIA SESSILIFOLIA (SESSILE LEAVED B.).	.20	1.50
U. S., 1 ft., May. Flowers cream color.		
VERNONIA FASCICULATA (IRON WEED).	.25	2.50
W. U. S., 5 ft., Sept. Flowers a rich dark violet purple; stem simple; flower heads numerous.		

	Each.	Per doz.
VERNONIA NOVEBORASCENSIS	.25	
Similar to last; both fine for wild garden or border.		
VERONICA AMETHYSTINA	.25	2.50
Eu., 8 in., June. A very fine border plant, with amethystine blue flowers in dense spikes from a neat mat of foliage; lasts in bloom a long time.		
VERONICA LONGIFOLIA (Long Leaved V.)	.20	2 00
Eu., 3 ft., July. Plant forms a neat upright clump, with spikes of light blue flowers.		
VERONICA PULCHELLA.	.25	2.50
Similar to first, but earlier flowered.		
VERONICA REPENS (Creeping V.)	.30	
Eu., June. Forms a dense mat of light green foliage, with white flowers, veined blue; very pretty and desirable for rockwork or open border.		
VERONICA VIRGINICA (Culver's Root)	.30	
U. S., 5 ft. Leaves in whorls: flowers white, in long spikes.		
VICIA GIGANTEA (Giant Vetch)	.30	
Or. A climber, with large pale blue flowers in racemes; moist soil.		
VINCA MINOR (Periwinkle)	.20	1.50
Eu., Apr May. An evergreen creeper, with blue flowers; grows nicely in shady situations, under trees, etc.; very often used on lots in cemeteries.		
VINCA MINOR var ALBA (White P.)	.25	2.00
A white flowered variety of above.		
VIOLA AUREA (Yellow Violet)	.25	
Or. Flowers pale yellow; moist rich shady spot.		
VIOLA BECKWITHII (Beckwith's V.)	.35	
Or., 6 in. Flowers large, purple, and yellow veined purple; very handsome: rich, moist, well drained soil; protect in winter.		
VIOLA CANADENSIS (Canada V.)	.25	
No. U. S., 8 in., June. Flowers white, tinged violet, pretty.		
VIOLA CANINA var. SYLVESTRIS (Dog V.)	.25	2.50
E. U. S. Flowers violet; plant handsome, with glossy green leaves; moist cool soil		
VIOLA CANINA var. ADUNCA (Hooked Spurred V.)	.25	
Or., 3 to 6 in. Flowers violet purple, large.		
VIOLA CORNUTA (Horned V.)	.25	
Eu., all summer. Flowers pale blue, pretty.		
VIOLA CUCULATA (Marsh V.)	.20	1.50
U. S. Flowers large, violet; leaves broadly heart shaped; wet soil, or open border in rich soil.		
VIOLA CUCULATA var PALMATA	.25	
A variety of last, with lobed leaves.		
VIOLA GLABELLA (Smooth V.)	.25	
Or. Flowers yellow, veined purple; cool shady spot.		
VIOLA NUTTALII (Nuttal's V.)	.30	
Or. Flowers yellow, tinged with brown or purple; cool shady spot.		
VIOLA PEDATA (Bird's Foot V.)	.20	1.50
E. U. S., 4 in., May. Leaves finely divided; flowers very large and handsome; should be cultivated in every garden.		

	Each.	Per doz.
VIOLA PEDATA VAR. BICOLOR. A very handsome variety of last, with the two upper petals very dark velvety purple, and three lower ones light blue.	.30	
VIOLA PEDATA VAR. ALBA. A white variety of last; very pretty, and a very free bloomer.	.30	
VIOLA PUBESCENS (YELLOW V.) E. U. S., 6 in., May. Flowers yellow; plant hairy.	.25	2.50
VIOLA ROSTRATA (SPURRED V.) N. U. S. A very pretty pale violet flower, with a long wide spur.	.25	2.50
VIOLA SAGGITATA (ARROW LEAVED V.) U. S., 4 in., May. Flowers dark blue; useful in dry spot in rockery.	.20	1.50
VIOLA SARMENTOSA Or. Flowers light yellow.	.25	
VIOLA STRIATA S. U. S. Flowers large, cream color; a vigorous grower.	.30	
YUCCA AUGUSTIFOLIA (NARROW LEAVED Y.) W. U. S. Leaves narrow and pointed, growing in a spreading cluster from the ground; flower in a large panicle, white.	.50	5.00
YUCCA FILLAMENTOSA (ADAM'S NEEDLE OR BEAR GRASS) S. and W. U. S. Leaves wider than last, with long white threads on edges, and sharp needle-like point giving it its name of *Adam's Needle*. The leaves form a spreading cluster from close to the ground, and are evergreen. The flower stem comes from the center of the leaves in June, and bears an immense panicle from 1½ to 3 ft. long of cream colored flowers that are 1½ to 2 in. in diameter; often 200 flowers on a stem. Very ornamental in the lawn as a single plant or in clumps; will grow in any soil, and is perfectly hardy.	.50	4.00

HARDY FERNS.

Plant ferns in a shaded spot on the north side of a fence, house or wall; the soil should be made up largely of leaf mould, if it is slightly cool and moist so much the better. A properly built rockwork in a shady situation could be covered with them very nicely, and for some ferns this would be preferable to the border. In planting a bed or rockery, care should be taken to use a sufficient number of evergreen ferns to make it look well in the winter.

	Each.	Per doz.
ADIANTUM PEDATUM (Maiden Hair)	.30	3.00
U. S., 1 to 1½ ft. The stems are black and polished; fronds handsomely divided; one of the finest of our native ferns; should be in every collection; deciduous; rich, moist, shady soil.		
ASPIDIUM ACROSTICHOIDES (Evergreen Shield Fern)	.25	2.50
U. S., 2 ft. Fronds form a handsome upright clump; dark green pinnate, evergreen.		
ASPIDIUM CRISTATUM (Crested S. F.)	.25	2.50
U. S., 2 ft. Fronds handsome dark green; partially evergreen.		
ASPIDIUM MARGINALE	.25	2.50
U. S., 1 to 2 ft. Fronds dark green, evergreen; nice for rockwork.		
ASPIDIUM NOVABORASCENSÆ	.25	2.50
U. S., 1 ft. One of the most delicate and pretty of our native Aspidiums; the fronds are very light green, and taper both ways to a point.		
ASPIDIUM SPINULOSUM (Common S. F.)	.20	2.00
U. S., 1 to 1½ ft. Fronds delicate, and finely cut; one of the commonest of our native ferns, but very pretty.		
ASPLENIUM AUGUSTIFOLIUM (Narrow Leaved Spleenwort)	.50	
E. U. S. A rare native, with narrow sharp pointed light green pinnae and upright growth.		
ASPLENIUM EBENEUM (Ebony S.)	.25	2.50
U. S., 6 to 8 in. Stem black and shining; fronds very narrow, from ¼ to ¾ in. wide; nice for rockwork.		
ASPLENIUM THELYPTEROIDES	.30	3.00
U. S., 2 to 3 ft. Fronds narrow, long and graceful; moist shady soil.		
ASPLENIUM TRICHOMANES (Dwarf S.)	.50	4.00
U. S., 4 to 6 in. An exceedingly delicate little fern, with shining stems, and very narrow fronds in a tuft.		

	Each.	Per doz.
BOTRYCHIUM TERNATUM VAR. DISSECTUM (CUT LEAVED MOONWORT)	.30	
A very pretty finely cut triangular frond, with bunches of fruit similar to a diminutive cluster of grapes; evergreen; very desirable for fernery.		
BOTRYCHIUM TERMATUM VAR. OBLIQUUM (OBLIQUE LEAVED M.)	.25	2.50
Similar to last, with less finely cut fronds.		
BOTRYCHIUM VIRGINICUM (VIRGINIA M.)	.30	3.00
N. U. S., 8 in. to 1½ ft. One of the most delicate and handsome ferns, with large finely divided triangular sterile fronds, and handsome feather-like fertile fronds rising above the sterile one; moist, shady, rich spot.		
CAMPTOSORUS RHIZOPHYLLUS (WALKING FERN)	.25	2.50
U. S. Prostrate, evergreen, with extended narrow fronds that form new plants at their ends; moist shady spot.		
CYSTOPTERIS BULBIFERA (BULBOUS BLADDER FERN)	.25	2.50
N. U. S. Fronds are very long, finely divided, light green, and graceful; the fronds bear bulblets on their backs that are capable of reproducing the plant; deciduous; suitable for slightly shaded rockwork.		
DICKSONIA PILOSICULA (DICKSONIA)	.20	1.50
A graceful light green fern; one of the prettiest to press for winter decoration; deciduous.		
LOMARIA SPICANT (HARD OR DEER F.)	.30	2.00
Or., 1 to 2 ft. Fronds long and narrow, 1 to 3 in. long; a showy evergreen fern; plant in moist shady place under evergreen.		
LYGODIUM PALMATUM (CLIMBING OR HARTFORD F.)	.25	2.00
One of the most beautiful ferns; much used when pressed for room decoration; plant in moist, cool, shady place in leaf mould, mulch, and give a support to climb on.		
ONOCLEA SENSIBILIS (SENSITIVE FERN)	.15	1.50
U. S. Useful to naturalize in wet spots; the fronds are triangular and light green.		
OSMUNDIA CINNAMONEA (CINNAMON F.)	.25	2.00
U. S., 3 to 5 ft. A tall graceful fern for rich wet places, with compact cinnamon colored fertile fronds rising from center of plant.		
OSMUNDIA CLAYTONIANA (CLAYTON'S F.)	.25	2.00
U. S. Similar to last, but some of the fronds have the pinules contracted to form the fertile frond.		
OSMUNDIA REGALIS (ROYAL F.)	.25	2.00
U. S., 3 to 5 ft. A very handsome fern for rich wet places; quite distinct in appearance from two last.		
PELLÆA ATROPURPUREA (CLIFF BRAKE)	.25	2.00
N. U. S., 6 in. to 1 ft. A pretty fern, with rounded divisions and dark stems; for dry spot in rockery.		
POLYPODIUM VULGARE (POLYPODY)	.20	1 50
N. U. S., 8 in. Frond evergreen; nice to cover the shady side of rocks or a moist soil; evergreen.		
PHEGOPTERIS DRYOPTERIS	.35	3.00
N. U. S., 8 in. A delicate and graceful fern, with triangular finely divided frond; place in moist cool shaded situation; deciduous.		

	Each.	Per doz.
PHEGOPTERIS HEXAGONOPTERA....	.30	2.50
N. U. S. Frond dark green, triangular, once divided; the two lower pinnæ forming an angle with the remainder of the frond; same situation as last; deciduous.		
PHEGOPTERIS POLYPODIOIDES.....	.30	2.50
Similar to last, with narrower and smaller fronds; same situation or rockwork		
STRUTHIOPTERIS GERMANICA (Ostrich F.).....	.30	2.50
U. S., 3 to 5 ft. One of the handsomest of our native ferns; the fertile fronds are wide, dark green, and curve gracefully outward, forming a plume like cluster, from the center of which the distinct and handsome dark brown fertile frond rises.		
WOODSIA ILVENSIS (Alpine Woodsia).....	.25	2.00
E. U. S., 2 to 6 in. A distinct and delicate fern, with pretty brownish and light green fronds.		
WOODSIA OBTUSA.....	.35	3.00
N. U. S. A very graceful and delicate fern; for moist rockwork; deciduous.		
WOODWARDIA ANGUSTIFOLIA (Narrow Leaved Chair Fern)...	.25	2.50
E U. S. A rare fern, for moist spots, with once divided long triangular fronds; deciduous		
WOODWARDIA VIRGINICA (Virginian C. F.).....	.20	2.00
E. U. S., 2 to 3 ft. Frond broad and long; nice for wet place.		

HARDY SHRUBS.

The prices here named are for first class blooming shrubs that are thoroughly established out of doors, such as will have an immediate effect. We can furnish smaller specimens of nearly all varieties named at a less price. We also have many fine specimen plants above the usual size; price on selection.

Those marked with a * are climbers.
Those marked with a † are evergreen.

	Each.	Per doz.
*ACTINIDIA POLGYAMA. Japan. A strong climber, with thick, oval, glossy, finely serrated leaves, clusters of large white flowers, and large showy bunches of crab apple shaped fruits; new and desirable.	.50	
*AKEBIA QUINATA. Japan. A rapid climber, with dark green leaves, and curious velvety purple flowers, which are quite fragrant and ornamental One of the best climbers.	.35	3 00
*AMPELOPSIS QUINQUEFOLIA (Virginia Creeper). U. S. Rapid climber, five leaflets on leaf stem, which color very brilliantly in the fall; fruit dark blue in clusters.	.25	2.00
*AMPELOPSIS VEITCHEII (Japanese Ivy). Japan. Very fine for covering walls, rocks and posts, clinging by tendrils very closely and firmly.	.50	
AMELANCHEIR CANADENSIS (June Berry or Shad Bush). U. S. Covered with white flowers in early spring; bears edible berries in June; a valuable and pretty shrub.	.50	4.50
AMORPHA CANESCENS (Wooly Indigo Shrub). S. U. S. A low handsome bush, with fine pinnate leaves, white, wooly branches, and spikes of a rich dark violet purple flowers.	.50	
AMORPHA FRUTICOSA (Indigo Shrub). S U. S., 10 ft., June. A tall shrub, with many spikes of dark violet flowers at ends of branches.	.50	
AMYGDALUS NANA var. ROSEA (Double Rose Flowering Almond). Persia, 5 ft., May. An old and beautiful shrub, with great numbers of double rose flowers and narrow leaves.	.50	
AMYGDALUS NANA var. ALBA (Double White Flowering Almond). Same as last, with white flowers.	.50	
ANDROMEDA ARBOREA (Sorrell Tree). S. U. S., 6 to 15 ft., Aug. Also called *Oxydendron Arborea.* A low tree or large shrub with gray bark, large oval, glossy leaves, and handsome compound racemes 6 to 8 in. long, of pure white flowers terminating the branches.	.50	

	Each.	Per doz.
†ANDROMEDA CALYCULATA (Leather Leaf)..... U. S., 1½ ft., May. This is the same as *Cassandra Calyculata*. It forms a low evergreen shrub, with pretty drooping terminal racemes of pure white flowers; branches slender, drooping; leaves light green, brown underneath.	.35	3.00
†ANDROMEDA FLORIBUNDA..... S. U. S., 2 ft, May. Flowers white, bell shaped, in clusters 3 to 6 in. long; foliage dark glossy green; plant compact; especially desirable.	.50	4.50
ANDROMEDA MARIANA (Stagger Bush)..... N. U. S., 2 to 3 ft., May. Flowers large, in drooping racemes; leaves oval, glossy green; branches light brown, drooping; very pretty.	.50	
†ANDROMEDA POLIFOLIA..... N. U. S., 1½ ft., May. A very ornamental little shrub, with glaucous green narrow leaves that turn to a richy glaucous purple, and hold this color through the winter, making the plant very attractive as it shows up through the snow; flowers white, and very pretty.	.50	4.50
†ARCTOSTYPHALOS UVA-URSI (Bear Berry)..... N. U. S., 6 in., June. A prostrate dark green, fine leaved evergreen, with pinkish white flowers, and crimson berries in the fall.	.50	
*ARISTOLOCHIA SIPHO (Dutchman's Pipe)..... With darker green leaves, 7 to 10 in. in diameter, and fragrant roots. A much stronger growth than next.	.75	6 00
*ARISTOLOCHIA TOMENTOSA (Slender Dutchman's Pipe)..... Slender branches; light green, medium sized heart shaped leaves; and flowers shaped like a Dutchman's pipe, of yellowish brown color.	.35	3.50
†AZALEA AMENA..... A neat, nearly evergreen, low growing, compact shrub of dwarfish habit; blooms early in summer. Cheerful magenta flowers, not generally supposed to be hardy, but hardy in our grounds.	.75	
AZALEA PONTICA (Ghent A.) June. This most beautiful tribe of plants is perfectly hardy. For superb effect upon the lawn, no deciduous plant can equal them, excepting the newer and larger flowered *A. Mollis*. They embrace flowers of every shade of white, pink, yellow, orange, crimson, and are desirable for groups and masses, in open ground. A soil with a considerable amount of leaf mould and sand is best for them, but they do well in any garden soil; only thoroughly composted manure should be used, when it is required.	1.00	
We have a good collection of named varieties; and when the selection is left to us we will select such as will represent the different shades and times of blooming. Those requiring a list of varieties will please correspond.		
AZALEA MOLLIS..... The flowers of this species are larger, and the colors are if possible more brilliant than the Ghent Azaleas. We have several colors,—orange, scarlet, rose, etc.	1.50	
AZALEA NUDIFLORA (Pinxter Flower)..... May. A native shrub, with beautiful pink and flesh-colored flowers, similar to next in shape.	.50	

	Each.	Per doz.
AZALEA VISCOSA (White Swamp Honeysuckle) ..... E. U. S., 4 to 6 ft., June, July. Leaves smooth, flowers clammy, like Moss Rose Buds, pure white, and very fragrant.	.50	3.00
BACCHARIS HALIMIFOLIA (Groundsell Tree)..... E. U. S., sea shore, 6 to 12 ft. Branches terminated by whitish flowers, followed by showy white down, that holds on until Dec.	.50	
BERBERIS VULGARIS (Berberry) ..... Eu., 4 to 8 ft., May. The yellow blossoms hang in numerous racemes, making it very ornamental in flower. Its red fruit makes a wholesome preserve. Ripe in Oct. The *Berberry* is a good hedge plant, used extensively in the West.	.35	3.00
BERBERIS VULGARIS PURPUREA (Purple Leaved Barberry)... 4 to 6 ft. An interesting and beautiful variety, with violet purple leaves from June to November, yellow bloom and red fruit.	.50	
*BIGNONIA CAPREOLATA (Cross Vine)..... Long glossy leaves; climbs by tendrils; flowers orange and red, 2 in. long, and showy; hardy.	.35	
BIGNONIA GRANDIFLORA..... A fine climber, with flowers not so long but more open and showy than next; flowers 2 to 3 in. in diameter.	.50	
BIGNONIA RADICANS (Trumpet Flower)..... A splendid, hardy climbing plant, with large trumpet-shaped orange and red flowers in August.	.25	2.50
BUXOS SEMPERVIRENS (Common Tree Box)..... A handsome evergreen shrub; always grows compact and globular; can be pruned into any form; with deep green foliage.	.50	
BUXOS SEMPERVIRENS var. LATIFOLIA (Broad-Leaved Box)... Leaves broad; growth open.	.50	
BUXOS SEMPERVIRENS var. MYRTIFOLIA (Myrtle-Leaved Box) A robust form, with myrtle-like leaves.	.50	
BUXOS SEMPERVIRENS var. VARIEGATA..... Variegated with yellow; compact grower.	.50	
BUXOS SEMPERVIRENS var. NANA (Dwarf Box).....per yard The well-known sort, used for edging along garden walks.	.25	
†CALLUNA VULGARIS (Scotch Heather)..... Eu. and U. S., 6 in. to 1 ft., July, Aug. A beautiful evergreen, moss-like shrub, with spikes of rose colored flowers; very desirable and hardy.	.50	
CARAGANA ARBORESCENS (Siberian Pea Tree)..... No. Eu., 6 to 12 ft., June. A large shrub, with pinnate leaves and bright yellow flowers, followed by brown pods.	.50	4.50
CALYCANTHUS FLORIDUS (Calycanthus, or Spice Bush) ..... S. U. S., 4 to 6 ft., June, July. A hardy shrub, with fragrant wood and leaves; flowers chocolate red, with odor of pineapple.	.35	3.50
CEANOTHUS AMERICANUS (New Jersey Tea or Red Root)..... N. U. S., 2 ft., June, July. A low shrub, with pretty white flowers in clusters Leaves used for tea during the American Revolution. Will grow in the most barren soil.	.35	3.50
*CELASTRUS SCANDENS (Bitter Sweet Roxbury Waxwork)..... A native climbing or twining plant, with large glossy leaves, yellow flowers and clusters of orange, capsuled fruit, which remains on vine all the fall and winter. It grows 10 to 12 ft. in a season.	.35	3.50
CEPHALANTHUS OCCIDENTALIS (Button Bush).....	.50	4.50

	Each.	Per doz.
N. U. S., 4 to 6 ft. July. Grows best in damp peaty soil; has a clear glossy leaf with pendulous round balls of fragrant pure white flowers.		
CHIONANTHUS VIRGINICA (White Fringe).....	.50	4.50
S. U. S., 6 to 12 ft. One of the best large shrubs or small trees, with superb foliage, and delicate, fringe like, snow-white flowers, resembling cut paper, with large blue fruit in clusters.		
CLEMATIS (Virgin's Bower)		
Species and varieties of Clematis are described among hardy herbaceous plants.		
CLETHRA ACCUMINATA.....	.50	
So. U. S., 4 to 8 ft, Sept. Foliage dark green; plant upright; flowers in drooping racemes, white.		
CLETHRA ALNIFOLIA (Sweet Pepper or White Alder).....	.35	3.50
N. U. S, 4 to 8 ft., Aug. Flowers white, in close raceme, very fragrant, and much sought after by bees, it being at the time of flowering one of the few plants that offer honey; very desirable as an ornamental plant; will grow in any soil.		
CORYLUS PURPUREA (Purple Hazel).....	.75	
A very desirable purple foliage plant.		
COLUTEA ARBORESCENS (Bladder Senna).....	.50	
6 to 8 ft., June, Aug. Very desirable on account of the long season of flowering: pods large and inflated, pink; flowers yellow.		
CORNUS ALTERNIFOLIA (Alternate-Leaved Cornel).....	.35	3.50
N. U. S., 15 ft., June. Reddish green bark, clear green leaves: both branch and leaf come out alternately, instead of opposite in pairs. Blossom white, berries blue.		
CORNUS CIRCINATA (Round-Leaved Cornel).....	.50	
N. U. S., 6 ft., July. Branches greenish; leaves large; fruit light blue.		
CORNUS FLORIDA (Flowering Dogwood).....	.50	4.50
E. U. S. White flowering dogwood. A native small tree of fine form; grows 10 to 20 feet; color of new shoots light purple. Old trees have fine rough bark; leaves of light green in summer they turn very brilliantly in autumn; flowers white and very showy, 2 to 3 inches in diameter, appearing before the leaves in spring: fruit crimson.		
CORNUS MAS VARIEGATA.....	.50	
Leaves beautifully variegated green and white. One of the best variegated shrubs; yellow blossoms before the leaves; fruit bright red, and eatable.		
CORNUS PANICULATA (Panicled Cornel).....	.35	3.50
N U S., 4 to 6 ft. June. Gray bunches, panicles of white blossoms: fruit white.		
CORNUS SANGUINEA (European Red Osier Dogwood).....	.35	3.00
Eu., 6 to 8 ft., June. Very conspicuous and ornamental in winter on account of its blood-red bark. Has a smooth, large leaf; grows to a large globular bush, 6 to 10 feet high and wide. A quite indispensable shrub; white flowers in June, with white berries; desirable as a hedge plant.		
CORNUS SERICEA (Silky Cornel or Kinnikinnik).....	.50	4.50
N. U. S., 6 to 8 ft., June. Branches purplish; fruit pale blue.		
CORNUS STOLONIFERA (Red Osier Dogwood).....	.50	4.50

	Each.	Per doz.
N. U. S., 4 to 6 ft., June. Branches red; fruit lead color.		
CORCHORUS JAPONICA (Japan Globe Flower)	.50	
4 to 6 ft. A slender green-branched shrub, covered with a profusion of globular yellow flowers from July to October.		
CORCHORUS JAPONICA VARIEGATA	.25	2.50
1 to 2 ft. A variety from Japan, with small green foliage, edged with white; slender grower; retains its leaves till late in Autumn.		
CRATEGUS OXYCANTHA (English Hawthorn)	1.00	
Double white shrub or small tree, with double white flowers; very ornamental		
CRATEGUS OXYCANTHA (Double Pink)	1.00	
With double pink flowers; brilliant when in blossom.		
CRATEGUS OXYCANTHA (Paul's Double Flowering)	1.00	
Bright red; one of the best and showiest hawthorns.		
†CRATEGUS PYRICANTHA (Pyricanth Thorn)	.50	
4 to 6 ft., May A handsome compact evergreen shrub, of irregular outline, with small leaves, bunches of white flowers followed by orange berries that hold on into the winter.		
DEUTZIA CRENATA (Double White Deutzia)	.50	4.50
Japan, 4 to 6 ft., June. One of the most popular shrubs; upright growing; full double white flowers.		
DEUTZIA CRENATA (Double Pink Deutzia)	.50	4.50
Same as foregoing, with pink flowers.		
DEUTZIA GRACILIS	.35	3.00
Low growing shrub, with fine leaves and very beautiful panicles of pure white flowers; used for forcing in green houses; blossoms in May and June.		2.00
†DAPHNE CNEORUM (Garland Flower)	.50	
Eu., 6 in. to 1 ft., May and Aug A handsome evergreen trailer, with glaucous green leaves, and terminal clusters of very pretty and fragrant pink flowers.		
DAPHNE MEZEREUM (Daphne)	.50	
U. S., 2 to 4 ft., May. A compact shrub, with violet flowers covering the branches in spring, followed by the leaves and handsome and numerous crimson berries.		
DESMODIUM RACEMOSUM	.50	
Japan, 4 ft., Aug. and Sept. A shrub with very long graceful drooping racemes of violet purple flowers; very fine; new.		
DIERVILLA SESSILIFOLIA (Sessil-Leaved Fly Honeysuckle)	.75	7.00
So. U. S., 2 to 4 ft., June. A rare southern species with light green foliage, compact spreading habit, and terminal panicles of honey yellow flowers; perfectly hardy.		
DIERVILLA TRIFIDA	.35	3.00
N. U. S., 1 to 2 ft., June. Leaves dark green, oval; flowers in axils, light yellow; will grow in moist barren soil.		
DIRCA PALUSTRIS (Moose Wood or Leather Wood)	.50	
N. U. S., 4 to 6 ft., May. Rare and desirable shrub, with bright yellow flowers covering the branches before the leaves appear; the bark is extremely tough and flexible; it forms a very regular formed shrub.		
ELEAGNUS ARGENTEA (Silver Thorn)	.50	
W. U. S., 6 to 10 ft. A shrub with silvery white leaves and crimson berries, dotted with white.		
EUONYMUS ATROPURPUREUS (Burning Bush)	.50	4.50

	Each.	Per doz.
U. S. Foliage is light green, and turns very brilliantly in the fall; the seeds which are orange and red are showy, and hold on for some time into the winter; the flowers are small and brown.		
EUONYMUS EUROPÆUS (Spindle Tree)	.50	
Eu., 6 to 15 ft. The foliage is smaller than last and darker green; the fruit is handsome, and holds on for a long while after the leaves have disappeared.		
†*EUONYMUS NANUS	.75	
Japan. An evergreen trailer, with narrow leaves that turn to a rich purple in the winter, making it very ornamental.		
†*EUONYMUS RADICANS (Trailing Euonymus)	.25	2.00
Japan. Leaves small, oval, dark green; a useful shrub for rockeries.		
†*EUONYMUS RADICANS var. VARIEGATUS (Variegated T. E.)	.35	3.00
Japan. A pretty variety of last, with leaves variegated with white.		
EXOCHARDIA GRANDIFLORA	.50	
Japan, 8 to 15 ft. A magnificent shrub, with light green foliage and large clusters of white flowers ¾ in. in diameter, with a small bright green center.		
FORSYTHIA SUSPENSA (Drooping Golden Bell)	.35	3.00
China, 6 to 8 ft., May. A shrub with beautiful drooping habit, oval, light green leaves, and very numerous bright yellow flowers; very desirable.		
FORSYTHIA VIRIDISSIMA (Golden Bell)	.35	3.00
China, 6 to 8 ft., May. Habit upright; leaves long, and dark glossy green; flowers numerous, yellow.		
GAYLUSSACIA FRONDOSA (Dangle Berry)	.50	
E. U. S., 2 to 3 ft., May. A shrub with drooping open racemes of yellowish flowers, and black eatable berries; branches drooping; leaves color prettily in fall.		
GAYLUSSACIA RESINOSA (Huckleberry)	.50	
E. U. S., 1 to 3 ft., May. A well known eatable berry; the foliage of this shrub is exceedingly showy in the fall.		
HALESIA TETRAPTERA (Silver Bell Tree)	.50	
S. U. S., 6 to 15 ft., May. Several large, white, bell-shaped flowers in bunches, along the branches before the leaves appearr; handsome and desirable.		
HAMAMELIS VIRGINICA (Witch Hazel)	.50	4.50
N. U. S., 6 to 15 ft., Nov. The latest shrub to flower; bright yellow flowers appear after the leaves fall; the foliage is also pretty; desirable for wet spot.		
HIBISCUS SYRIACUS (Althea or Rose of Sharon)	.50	4.50
Levant, 6 to 10 ft., Aug. This shrub is of a neat upright habit, bears pruning well, and flowers at a time when there are few shrub flowers. We have varieties with purple, red, white, variegated flowers.		
HIBISCUS SYRIACUS var. VARIEGATUS (Variegated Leaf Althea)	.50	
Foliage distinctly marked with white, yellow, and green; holds the variegation all the season; very desirable.		
†HUDSONIA ERICOIDES (Heath Leaved H.)	.35	
E. coast U. S., 6 in. to 1 ft., May, June. A dwarf trailing shrub, with heath-like leaves and yellow flowers on slender stems; interesting and desirable.		

	Each.	Per doz.
†HUDSONIA TOMENTOSA (Wooly H.)..	.35	
E. coast U. S. Heath-like, with leaves covered with white wool.		
HYDRANGEA ARBORESCENS	.25	2.00
U. S., 2 to 4 ft., Sept. Foliage light green; flowers in flat panicles, with fine white flowers bordered by large ray flowers.		
HYDRANGEA NIVEA	.35	3.00
S. U. S., 3 to 2 ft., Aug. Sept. Leaves oval, with pure white under surface; flowers similar to last, but more showy.		
HYDRANGEA PANICULATA	.50	
Japan, 4 to 8 ft. Of more upright growth than next, and flower heads with many small flowers among the ray flowers; very pretty.		
HYDRANGEA PANICULATA var. GRANDIFLORA	.50	
Japan, 4 to 6 ft. With immense panicles of large white ray flowers, that turn pink in the fall; the finest shrub of recent introduction; should be in every collection.		
HYDRANGEA QUERCIFOLIA (Oak Leaved Hydrangea)	.50	
Leaves large, lobed, with brownish under surface; flowers in large pinkish panicles, similar, but with smaller clusters than last		
HYPERICUM AUREUM	.75	
U. S., July to Sept. A splendid shrub, with roundish leaves, drooping habit, and bright yellow flowers 1 in. in diameter, with innumerable fine yellow stamens; very desirable and rare.		
HYPERICUM PROLIFICUM (Shrubby St. John's Wort)	.50	
U. S., 3 to 5 ft., Aug. Sept. Habit of shrub neat, upright, with fine branches, narrow leaves, and very numerous bright yellow flowers.		
HYPERICUM KALMIANUM (Kalm's St. John's Wort)	50	4.50
No. U. S., 2 to 3 ft., July, Sept. Flowers large, yellow; leaves narrow; very desirable.		
ILEX OPACA (American Holly)	.75	
E. U. S., 6 to 15 ft. A rare shrub, with leaves like English holly, and red fruits.		
ISEX VERTICELLATA (Black Alder or Winter Berry)	50	
E. U. S., 6 ft, June. Flowers white and very numerous; leaves dark green; branches covered with bright crimson fruits, that hold on into the winter for some time.		
ITEA VIRGINICA	.50	4.50
S. U. S., 3 to 5 ft., June. A rare and handsome native, with glossy leaves and pretty drooping racemes of white flowers.		
JAMESIA AMERICANA	.75	
N. U. S., 1 to 2 ft. A rare shrub, with white flowers, wooly leaves, and an upright habit of growth.		
†KALMIA ANGUSTIFOLIA (Lamb Kill)	.35	3.00
E. U. S, 1½ ft., June A low upright shrub with narrow evergreen leaves, and pretty red flowers in bunches.		
†KALMIA GLAUCA (Pale Kalmia)	.50	5.00
N. U. S, 2 to 3 ft., June A very rare native, with narrow glossy green leaves, white underneath, slender, flattened glossy brown branches, and light pink flowers in clusters.		
†KALMIA LATIFOLIA (Mountain Laurel)	.50	5.00
N. U. S., 4 to 6 ft., June. One of the finest evergreen shrubs, with large dark glossy green leaves, and very numerous and handsome bunches of pink flowers.		

	Each.	Per doz.
LAURIS BENZOIN (Spice Bush) N. U. S., 6 to 8 ft., May. Whole plant pleasantly fragrant; branches with numerous bright yellow flowers, followed by red berries; a very neat shrub.	.50	
†LEDUM LATIFOLUM (Labrador Tea) N. U. S, 1 to 2 ft, May. A rare native, with narrow leaves covered with brown wool underneath, and clusters of fragrant white flowers.	.75	
*LONICERA AUREA RETICULATA (Variegated Japan H.) Leaves beautifully veined with yellow, giving the plant a distinct yellow appearance; a very desirable moderate climber; flowers cream color.	.50	4.50
*LONICERA BELGICA (Belgian H.) June, July. A strong climber, with fragrant red and buff flowers.	.50	
LONICERA CILIATA (Early Fly H.) U. S. Flowers honey yellow; fruit red; leaves hairy.	50	
LONICERA CŒRULEA (Blue Fruited Honeysuckle) E. U. S. Upright; fruit blue; flowers light yellow; rare.	.75	
*LONICERA FLAVA (Minnesota H.) Extremely hardy, strong hardy grower, growing in nursery 6 to 10 feet in a season. In the Minnesota forests, growing to top of trees 30 to 40 feet high. Upper leaves round, with stem through center; flower greenish yellow; large clusters of brilliant scarlet fruit remaining on vines many weeks in autumn.	.50	4 50
LONICERA GRANDIFLORA Showy, and flowers carmine and white striped.	.50	
*LONICERA HALLIANA (Hall's Japan) Japan Leaves evergreen in a protected situation; flowers opening white and turning yellow; very delicately fragrant; a strong and luxuriant climber, and very desirable—should be in every collection.	50	4.50
LONICERA MORROWII (Morrow's H.) Japan. May. A new shrubby honeysuckle of much merit, the habit is drooping but compact; a strong grower; leaves are oval and slightly hairy; the flowers are produced in great profusion and are light yellow, and the fruit is nearly ¼ in. in dia., bright, shiny crimson, in pairs and very abundant, giving the plant a very showy appearance for a long time both in the spring and fall.	.75	6.00
*LONICERA SEMPERVIRENS (Trumpet H.) U. S., Eu. A climber, with glaucous green leaves and branches of crimson trumpet-shaped flowers; desirable.	.50	
LONICERA SEMPERVIRENS var. AUREA (Yellow T. H.) A variety of last, with light yellow flowers.	.50	
LONICERA TARTARICA (Tartarian or Bush H.) 6 to 10 ft., May. A well known and desirable shrub, with pink flowers, followed by numerous red berries in the fall.	.50	4.50
LONICERA TARTARICA var. ALBA (White T. or B. H.) A variety of last, with white berries and yellow flowers.	.50	4.50
LIGUSTRUM IBOTI Japan A new and desirable privet with light-green foliage, drooping habit and pretty white flowers; very neat.	.75	
LIGUSTRUM MYRTIFOLIUM (California Privet.)	.35	3.00

	Each.	Per doz.
A desirable shrub, with neat upright habit, dark glossy green leaves, and racemes of white flowers; useful at seashore.		
LIGUSTRUM VULGARE (Common P. or Prim)	.35	3.00
Eu. A useful shrub for hedges; with white flowers and black berries.		
MAGNOLIA GLAUCA	.50	
S. U. S. Foliage small; flowers white, very fragrant.		
MAGNOLIA GLAUCA var LONGIFOLIA	.75	
A variety of last, with long narrow leaves.		
MAGNOLIA GRACILIS	.50	
China. Foliage light-green, flowers large, purple and white; plant in protected situation.		
MAGNOLIA PURPUREA	.50	
Flowers large, purple; plant in protected situation.		
MAGNOLIA SOULANGEANA	1.00	
Japan, 6 to 15 ft., May. A beautiful shrub, with large and very numerous white flowers.		
MAHONIA AQUIFOLIA (Ashberry)	.35	3.00
U. S., 2 to 3 ft., May. Flowers yellow, in large bunches; fruit orange, holds on for a long time in the winter; leaves evergreen and like English holly; plant in moist shady situation.		
MENISPERNUM CANADENSIS (Moonseed)	.35	3.00
E. U. S. A slender climber with very pretty foliage, white flowers and black fruit.		
MYRICA GALE (Sweet Gale)	.50	
E. U. S., 3 to 4 ft., May. An upright shrub with reddish catkins.		
MYRICA CERIFERA (Bay Berry)	.50	
E. U. S., 3 to 5 ft. Leaves are pleasantly fragrant; berries are covered with a white or greenish wax, that was much used in old times in tallow candles to harden the tallow.		
NEMOPANTHES CANADENSIS (Mountain Holly)	.50	4.50
N. U. S., 6 to 10 ft. A native shrub with insignificant flowers, but very pretty and numerous coral red berries in the fall; foliage oval, light green; habit neat.		
PAVIA MACROSTACHYA (Dwarf Horsechestnut)	.50	4.50
W. U. S., 4 to 8 ft. A handsome shrub, with flowers in a spike, 1 ft. or more long, white with red stamens protruding, giving the spike a very pretty appearance		
PERIPLOCA GRÆCA (Silk Vine)	.50	
Strong twiner, with long, willow-like pointed glossy leaves, and fragrant root: greenish yellow flowers, and silky fruit.		
PHILADELPHUS CORONARIUS (Mock Orange or Sweet Scented Syringa)	.50	
S. U. S., 6 to 12 ft. Flowers in clusters; very fragrant		
PHILADELPHUS GRANDIFLORUS (Large Flowered Syringa)	.50	
Flowers larger than in last, and plant a stronger grower.		
POTENTILLA FRUTICOSA (Shrubby Potentilla)	.35	3.00
E. U. S., 2 to 4 ft. Leaves fine, parted, with silky under surface; flowers bright yellow, in clusters at ends of branches.		
PYRUS JAPONICA (Japan Quince)	.50	4.50
Japan, 4 to 6 ft., May. A very showy shrub, with brilliant crimson flowers; same as *Cydonia Japonica*.		

	Each.	Per doz.
RHAMNUS CARTHATICUS (Buck Thorn)	.25	2.00
A very useful hedge plant, with dark green leaves and black berries.		
†RHODODENDRON	1.00	
An evergreen shrub, with immense trusses of large flowers, ranging through shades of red, white and purple.		
We offer unnamed seedlings, many of which are as fine as the named ones, at a cheaper rate than for the named varieties. A list of our named varieties, with prices, will be sent on application.		
RHODORA CANADENSIS (Rhodora)	.50	4.50
N. U. S., 2 to 3 ft., May. Leaves glaucous; flowers showy, rose purple, in clusters, terminating the branches before the leaves appear; very desirable.		
RHUS COPALLINA (Dwarf Sumac)	.50	4.50
E. U. S., 4 to 6 ft. Flowers yellowish in clusters; foliage pinnate; berries dark red.		
RHUS CONTINUS (Smoke Tree or Purple Fringe)	.50	4.50
A very much admired and conspicuous shrub or small tree, with spreading habit, covered in midsummer with a profusion of dusky fringe-like flowers. Desirable from its striking peculiarity of flowering.		
RHUS GLABRA (Sumac)	.50	4.50
E. U. S., 6 to 10 ft. Similar to last, with larger clusters of flowers and fruit, and larger pinnate leaves.		
RHUS GLABRA var. LASCINIATA (Fern Leaf Sumac)	.50	4.50
A variety of last, with handsome finely cut fern-like leaves.		
RHUS OSBECKII (Osbeck's S.)	.75	
No. Asia, 10 to 20 ft. A rapid growing, handsome small tree, covered in June with immense panicles of cream colored flowers, often a foot long and the same in diameter.		
RHUS TYPHINA (Stag Horn S.)	.50	4.50
E. U. S., 10 to 20 ft. This shrub has a handsome tropical appearance with its very large pinnate leaves; the fruit is in large dark cardinal red clusters, terminates the branches, and is very striking.		
RIBES AUREUM (Missouri Currant)	.50	
W. U. S., 6 ft; May. Flowers in racemes yellow, with red eye; they have a very agreeable spicy fragrance; fruit black, eatable.		
RIBES FLORIDUM (Wild Black Currant)	.35	3.00
E. U. S. Flowers greenish yellow, in racemes; fruit black, eatable; a strong grower.		
RIBES UTAH	.50	
W. U. S. Flowers yellow, in racemes; fruit blue, eatable.		
ROSA ALPINA (Alpine Rose)	.50	
Alps, 4 to 6 ft. A very pretty single rose, with fragrance of the *Sweet Briar*; rare.		
ROSA ALPINA var. LUCIDA	.50	
An upright, rather dwarf variety of last, with smooth stems and yellow bark; flowers single, light rose.		
ROSA CAROLINA (Carolina Rose)	.35	
U. S., 2 to 4 ft. Flowers single, and very pretty.		
ROSA HARRISONII (Harrison's Yellow)	.50	4.50
A double yellow garden variety; the best double yellow rose.		

	Each.	Per doz.
*ROSA RUBIGINOSA (Sweet Briar). June. A climber, with very pleasantly fragrant foliage.	.50	
ROSA RUGOSA. Japan, 2 to 5 ft., June. The foliage of this plant is very luxuriant and handsome, dark green; buds very pretty and numerous; flowers single, dark rose, large; fruit very large and showy, eatable.	.50	
ROSA RUGOSA var. ALBA. A white variety of last, with very pretty buds.	.50	
*ROSA SETIGERA (Prairie Rose). W. U. S., June. The single flowered type of the cultivated varieties, a strong climber, with very pretty and numerous rose colored flowers in clusters.	.50	4.50

ROSA (Roses). The following lists furnish a good variety in color and form, and include many of the finest varieties. They are sufficiently large for those who only desire a few varieties. Those wishing a larger collection please correspond.

HYBRID PERPETUALS.

Hybrid Perpetual, or Remontant Roses are hardy, and free bloomers as often as new growth is formed by cutting back just after blooming; 2 or 3 crops of roses are a common result in a season. They are of all shades of colors, from very dark red to perfectly white, and are in every way worthy of general cultivation.

Alfred Colomb. Carmine crimson; very large and fragrant; one of the best.	.50
Anna de Diesbach. A lovely carmine shade, full double, and very fragrant.	.50
Auguste Mie. Very handsome silvery rose, free bloomer, and vigorous grower.	.50
Baroness Rothschild. Light pink; free bloomer; moderate grower.	.50
Baron Prevost. Deep rose, very large and full; great bloomer; one of the best.	.50
Beauty of Waltham. Rosy crimson; free bloomer; large flower.	.50
Caroline de Sansal. Clear delicate flesh color, becoming blush; a magnificent variety.	.50
Chas Margotten. Fiery red, shaded crimson; large flower.	.50
Fisher Holmes. Can be described as an improved Gen. Jacqueminot.	.50
General Jacqueminot. Brilliant dark crimson scarlet, very showy and effective; a great favorite.	.50
General Washington. Brilliant rosy crimson, large and double; fine, moderate grower	.50
John Hopper. Rose, with rosy crimson center; a splendid rose.	.50
Jules Margotten. Carmine rose, large, full, and fragrant.	.50

	Each.	Per doz.
La France	.50	
Silvery red, changing to pink; very fine.		
Mabel Morrison	.50	
White, and fine.		
Madam Chas. Wood	.50	
Reddish crimson; a very free bloomer.		
Perfection des Blanches	.50	
Considered by many the best white rose.		
Portland Blanche	.50	
White.		
Pius the IX	.50	
Bright purplish red, changing to violet; very large, full, and free bloomer		
Sydonie	.50	
Blush; large, fine, and distinct; vigorous.		
Victor Verdier	.50	
Brilliant rose; a magnificent flower and plant.		
Mad. La Charme	.50	
White, tinged with rose in the bud; free bloomer.		
Duke of Edinburgh	.50	
Deep crimson; very fine.		
Paul Neyron	.50	
Dark blush; enormous flowers; fine habit.		

MOSS ROSES.

Crimson	.50	
Semi-double, but showy, very hardy; double light red.		
Glory of Mosses	.50	
Pale rose; very large, full and beautiful.		
Laneii	.50	
Rich crimson; good grower; a very beautiful rose.		
Luxemburg	.50	
Large, cupped, fine purple crimson; a luxuriant grower and fine bloomer.		
Madame Alboni	.50	
Bright pink; fair grower; very mossy.		
Princess Adelaide	.50	
Blush, becoming quite pale; very double and well formed; one of the most vigorous growers of all the Mosses.		
Salet	.50	
Vigorous grower; free bloomer; rose color; one of the best of the older Moss Roses.		
White Moss	.75	
Often called Perpetual White. It is a long season in bloom, large clusters and a profusion of moss and fragrance. In demand beyond the supply.		

CLIMBING ROSES.

Baltimore Belle	.50	
A Prairie Rose, almost white; bloooms in clusters. This is much called for.		

	Each.	Per doz.
BEAUTY, OR QUEEN OF THE PRAIRIE. One of the strongest growers; flowers in clusters; red, very profuse bloomer. One of the most desirable of all climbing roses.	.50	
BOUSAULT. A semi-double rose: the first to bloom in any collection, one of the hardiest. Dark red bark; has few or no thorns.	.50	
GEM OF THE PRAIRIES. Almost the only Prairie Rose with fragrance; flowers rosy red.	.50	
GREVELLE, OR SEVEN SISTERS. Large clusters of white bloom shaded to light red; strong grower	.50	
SWEET BRIER. Noted for the aromatic perfume of the leaf during the whole season; the flower is also fragrant, pale rose color, with yellow center, single; strong, upright grower.	.50	
QUEEN OF AYRESHIRE. Free bloomer; dark purple crimson; does finely on poor soil.	.50	
QUEEN OF THE BELGIANS. Very free grower; pure white; does finely on poor soil.	.50	

SUMMER ROSES.

BLUSH ROSE. Double. The most fragrant of all; light pink; an old favorite.	.50	
DAMASK ROSE. Double; pale red; full and very fragrant.	.50	
MADAME PLANTIER. One of the Hybrid China Roses. Strong upright grower; green bark, very free from thorns, entirely hardy; blooms profusely in clusters of small white, very double flowers.	.50	
HARRISON'S YELLOW. Golden yellow; free bloomer.	.50	
OLD COTTAGE. White; an old variety and very scarce. This old white rose is seen about some farm houses, 6 to 8 ft. high, and loaded with roses. This is very hard to propagate.	.50	
PERSIAN YELLOW. Deep clear yellow; small, but neat; blooms early. The finest of the yellow roses.	.50	
SCOTCH PINK. Delicate pink, cupped, early, single.	.50	
TUSCANY. Darkest purple of all roses; very double.	.50	
RUBUS FLORE PLENO. A variety with bunches of pretty white full double flowers.	.75	
RUBUS NUTKÆUSIS. Or. A very fine variety from the West, with large white flowers 2 in. in diameter. Protect, as its hardiness has not yet been proven.	.75	
RUBUS ODORATUS (FLOWERING RASPBERRY). N. U. S., 4 to 5 ft. Foliage large and handsome; flowers dark rose color, showy; fruit flattish, with a very pleasant flavor.	.35	3.00

	Each.	Per doz.
SAMBUCUS CANADENSIS (Elder) ..... N. U. S., 3 to 6 ft., July. A fine native shrub with handsome dark green foliage, very large flat cymes of white flowers, followed by purple berries; makes a very fine cultivated plant.	.50	
SAMBUCUS CANADENSIS var. AUREA..... A very handsome and permanent golden leaf, variety of the last.	.50	
SAMBUCUS VARIEGATA ..... A variety with silver variegated leaves.	.50	
SMILAX ROTUNDIFOLIA (Green Briar or Cat Briar)..... Yellow green, heart-shaped leaves and branches; large close clusters of black berries, with bloom, which hold on long into winter; has strong prickles; would form an impregnable hedge if trained on supports. A high climber.	.50	
SPIRÆA BILLARDI (Billard's S) ..... 4 to 6 ft., June, July. Habit upright; flowers in terminal spikes, rose.	.35	3.00
SPIRÆA CALLOSA (Fortune's Spiræa). ..... China, 6 ft. Flower in flat rose colored cymes; young foliage handsome.	.50	4.50
SPIRÆA CALLOSA var ALBA (Dwarf White Sp.)..... 2 ft., June, July. One of the handsomest, compact, dwarf, with light green foliage, pure white flowers that are produced for a long season	.50	4.50
SPIRÆA CALLOSA var. RUBRA..... 3 ft. A dwarf, more slender and compact grower than first, with red flowers.	.35	3.00
SPIRÆA CHAMÆDRIFOLIA (Germander Leaved S.)..... Branches slender, drooping; leaves glaucous, green; flowers in bunches covering branches; one of the finest.	.50	
SPIRÆA CRATEGIFOLIA ..... Leaves oblong; flowers in clusters, white; habit upright.	.50	
SPIRÆA CRISPA (Crisp Leaved S.)..... Japan, 6 to 8 in. A peculiar dwarf plant, with crimped dark green leaves and numerous clusters of dark red flowers; interesting and desirable.	.50	
SPIRÆA DOUGLASII (Douglas's S)..... Or., 3 ft., June. Leaves white underneath; flowers in terminal spike; very bright rose.	.50	4.50
SPIRÆA HYPERICIFOLIA (St. Peter's Wreath)..... July. Leaves numerous, small, dark green; branches slender, drooping; flowers white, very numerous; a very pretty variety.	.35	3.00
SPIRÆA NOBLEANA..... A species with flesh colored flowers and light green leaves.	.50	
SPIRÆA OBLONGIFOLIA..... A species with oblong leaves and white flowers in terminal clusters.	.50	
SPIRÆA OPULIFOLIA (Nine Bark)..... W. U. S., 8 to 10 ft. Bark in flakes, rough; flowers in cluster, white.	.35	3.00
SPIRÆA OPULIFOLIA var. AUREA (Golden Spiræa)..... A very desirable golden foliage; plant with flowers like last.	.50	
SPIRÆA PRUNIFOLIA (Bridal Wreath)..... China, 4 to 6 ft. Slender branches, covered with full double, pure white flowers $\frac{1}{4}$ in. in diameter, followed by small oval leaves that turn to a brilliant crimson in the fall.	.50	4.50

	Each.	Per doz.
SPIRÆA REEVESII	.50	
Japan, 4 to 5 ft. Flowers white, in clusters; leaves narrow, very fine: same as *Spiræa Lanceolata.*		
SPIRÆA REEVESII FLORE PLENO	.50	
A full double variety of last.		
SPIRÆA SALICIFOLIA (WILLOW LEAVED S.)	.35	3 00
E. U. S., 5 to 6 ft. A pretty native, with terminal clusters of white flowers.		
SPIRÆA SALICIFOLIA VAR. ROSEA	.50	
A very handsome rose colored variety of last.		
SPIRÆA THUMBERGII (THUMBERG'S S.)	.5	4.50
Japan, 4 to 5 ft. One of the finest shrubs of recent introduction: the slender gracefully drooping branches covered with pure white flowers, that are followed by very narrow light green leaves that turn to a rich crimson in the fall, and hold on for some time into the winter.	.20	
SPIRÆA TOMENTOSA (HARDHACK)	.35	3 00
U. S. A neat shrub that is improved by cultivation, and will do finely on the sea shore: flowers dark red; foliage dark.		
SYRINGA JOSIKÆA (JOSIKÆ'S LILAC)	.50	4.50
6 to 8 ft., May. A very distinct species with large very dark green glossy leaves, stiff upright branches, and terminal clusters of rather fine and delicate dark violet flowers.		
SYRINGA PERSICA (PERSIAN LILAC)	.50	4.50
Persia, 6 to 8 ft., June. Habit drooping; flowers in large light violet drooping clusters; fragrant.		
SYRINGA VULGARIS (COMMON LILAC)	35	3.00
Persia, 8 to 10 ft., May. Flowers violet, fragrant		
SYRINGA VULGARIS VAR. ALBA	.50	4.50
A beautiful white flowered variety of last.		
SYRINGA VULGARIS VAR. GEORGE THE X.	.50	
A variety with larger, better colored, more compact flower clusters.		
SYMPHORICARPUS RACEMOSUS (SNOWBERRY OR WAXBERRY)	.50	4.50
W. U. S., 4 to 5 ft., May. A well known slender branched shrub, with small, pink flowers, and large white berries, that hang on the plant through part of the winter.		
SYMPHORICARPUS VULGARIS (INDIAN CURRANT)	.50	4.50
W. U. S. Drooping habit; foliage, flowers, and fruit small, but very numerous: the red berries hang on all winter, and look very pretty.		
SYMPHORICARPUS VULGARIS VAR. VARIEGATA	.50	
Same as foregoing, with yellow variegated leaves: very pretty.		
TAMARIS GALLICA	.50	4.50
Slender branches; cypress like foliage; pink flowers; does well on sea shore.		
VACCINIUM CORYMBOSUM (HIGH BUSH BLUEBERRY)	.50	
U. S. Flowers white: fruit blue, eatable.		
VACCINIUM MACROCARPON (COMMON CRANBERRY)	.50	
A plant with edible red berries; grows in swamps.		
VACCINIUM OXYCOCCUS (SMALL C.)	.50	
N. U. S. A rare species, with small fruits and narrow leaves.		
VACCINIUM PENSYLVANICUM (DWARF BLUEBERRY)	.50	
N. U. S., 6 in. to 1 ft. Fruit ripe very early.		

	Each.	Per doz.
VACCINIUM VACILLANS (Half High B.) ..... Leaves glaucous; fruit large.	.50	
VIBURNUM All the species have white flowers: they are all fine shrubs, and worthy of cultivation: nearly all are from Eastern U. S.		
VIBURNUM ACERIFOLIUM (Maple-Leaved Viburnum or Dockmackie) ..... Slender shrub; maple like leaves; purple berries.	.50	
VIBURNUM DENTATUM (Arrow Wood) ..... Gray bark; large leaves; cymes of white flowers; peculiar seed.	.50	
VIBURNUM LENTAGO (Sweet Viburnum or Sheep Berry)..... Leaves ovate, and pointed; fruit edible. Makes a tree.	.50	
VIBURNUM LANTANOIDES (Hobble Bush)..... A large, robust shrub, with soft hoary leaves, and large clusters of white flowers in May: retains its foliage till very late; quite ornamental in all respects.	.50	
VIBURNUM NUDUM (Withe Rod).... Leaves oval; flowers white in cymes.	.50	
VIBURNUM OPULIS (High, or Bush Cranberry)..... Both ornamental and useful. Its fruit is esteemed by many; resembles the Snowball in wood and foliage.	.50	4.50
VIBURNUM OPULIS STERILIS (Guelder Rose, or Snowball Tree) A well-known variety shrub, of large size, with globular clusters of pure white sterile flowers.	.50	4.50
VIBURNUM PLICATUM (Plicate Viburnum)..... From North China. With globular heads of pure white neutral flowers. One of the most valuable flowering shrubs.	.50	
VIBURNUM PRUNIFOLIUM (Black Haw)..... Fruit edible.	.50	
*VITIS BIPPINATA..... Has deeply lobed leaves, and blue berries; very pretty.	.50	
*VITIS HETROPHYLLA VARIEGATA..... Mottled with white and green; deeply lobed leaves; blue berries	.75	
WEIGELIA ALBA..... Dwarf habit; pure white flowers; not common.	.50	
WEIGELIA AMABALIS..... Dark red flowers; more robust habit than W. rosea, and larger leaves.	.50	
WEIGELIA DEBOISIANA..... A very strong grower, with light pink flowers; foliage large.	.50	
WEIGELIA ROSEA..... An elegant shrub, with fine rose-colored flowers, introduced from China by Mr. Fortune, and considered one of the finest plants he has discovered; quite hardy, blossoms in May.	.50	4.50
WEIGELIA VAN-HOUTEII... A strong grower, with numerous dark red flowers.	.50	4.50
WEIGELIA ROSEA VARIEGATA..... Very desirable shrub, with wide yellow edge to leaf, and pink flowers.	.50	
*WISTARIA MAGNIFICA..... Flowers in dense drooping racemes of a pale lilac, of the same size as the Chinese, with the graceful foliage of the American. Very rapid grower, growing 15 to 20 ft. in a season. Vigorous and perfectly hardy.	.35	3.50

	Each.	Per doz.
*WISTARIA SINENSIS (Chinese Wistaria).	.50	
One of the most elegant and rapid growing of all climbing plants. Has long pendulous clusters of pale blue flowers in spring and autumn.		
*WISTARIA SINENSIS ALBA.	1.00	
Introduced by Mr. Fortune from China, and regarded as one of his greatest acquisitions.		
WISTARIA SINENSIS Flore Pleno	1.00	
A new, double purple Wistaria; very fine.		
*WISTARIA FRUTESCENS (American Wistaria)	.50	
A less vigorous grower than Magnifica, with short clusters of very light purple flowers.
